PBU Series 21 & 27

Propane Powered Burnishers

Advance

FACT SHEET

The new Advance PBU series propane-powered burnishers are loaded with performance features to make your floors shine in less time.

The PBU series provides the fastest high-gloss burnishing available. The Advance PBU 21 has a 21 inch (53 cm) pad size and can burnish up to 25,000 square feet (2,322 m^2) per hour, while the PBU 27 model offers a larger 27 inch (68 cm) pad capable of burnishing up to 33,000 square feet (3,066 m^2) per hour. Simple controls ensure your operators won't be slowed down with machine adjustments — just start it and go.

Powerful 603cc Twin-V engines provide the torque to drive the pad at a high rpm that produces a sparkling shine. Select models offer catalytic mufflers, a heavy-duty felt seal on the shroud that provides the best dust control on the market and CARB Gard™, a device that shuts off the engine if it detects harmful emission levels.

Easy pad changing, low maintenance and rugged dependability round out the benefits of choosing the new Advance PBU series of propane-powered burnishers.

TYPICAL APPLICATIONS INCLUDE

- Large Retail Stores
- Shopping Malls
- Supermarkets
- Government Facilities
- Educational Facilities
- Airports

MACHINE OPTIONS INCLUDE

- Dust-control
- Automatic shut-down
- Centrifugal clutches
- Catalytic mufflers
