Rite in the Rain®

— DEFYING MOTHER NATURE —

Yes, *Rite in the Rain* is a recyclable paper, but unlike plain paper... it won't turn to mush when exposed to:

*rain
storms*

*heavy
sweat*

*oil &
grease*

*soaked
work area*

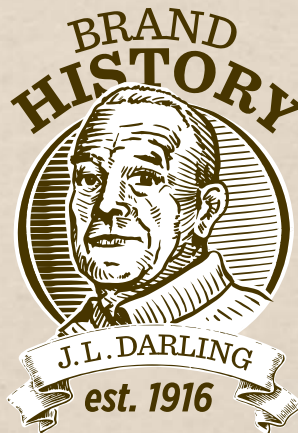

*mud &
grime*

*laundry
mishap*

— ALL-WEATHER TOUGH! —

The *Rite in the Rain* story began a century ago in the forests of the Great Pacific Northwest. Entrepreneur Jerry Darling recognized the logging industry's need for a durable material that could be written on and survive in poor weather conditions. Jerry developed a special coating that created a unique moisture shield on the hand-dipped sheets of paper that he and his wife, Mary, processed at their home. From these humble beginnings, our first all-weather paper was born. Over the many years we've perfected and patented our environmentally responsible coating process. Still located in Tacoma, our continued mission is to provide innovative products for professionals and enthusiasts who brave the outdoors.

CENTENNIAL BOOKS

FEATURED PRODUCTS

ITEM Nº 100-M & 100-LG

The lush forests of Western Washington are the heart of this state. From our towering western hemlock and true fir trees were built the foundations of Seattle, Tacoma, and Olympia. Washington wood fueled the 19th-century San Francisco gold rush. From Washington wood were made the ties of the transcontinental railroad. American history was built from our timber.

The loggers who fell these woods in the early 20th century were the embodiment of tough. Washington was still wild, and many of our state's smaller cities were merely remote, unincorporated logging towns at the time. Towns like Aberdeen and Forks see nearly 200 days of precipitation per year. Long, physical workdays were only made longer by the ceaseless rain.

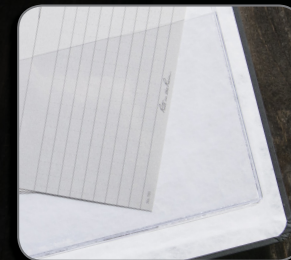

It was from these forests and the hardy spirit of these workers that *Rite in the Rain* came to be. Starting in 1916, entrepreneur Jerry Darling invented a process to make weatherproof sheets of paper for Washington timber surveyors. 100 years later, *Rite in the Rain* All-Weather Writing Products are used in harsh weather around the world. After a century of battling Mother Nature to protect your notes, we are proud to present our Centennial Series of All-Weather Bound Books.

TOP-SPIRAL NOTEBOOKS & KITS

FEATURED PRODUCT

ITEM Nº 135

Hard years on the farm will instill a doctrine to bend but never break. On the old willow in the yard, the passage of time takes its toll. Scratches become scars, and scars become stories. The wind blows, the rain falls, and that creaky old tree bears it all.

You see yourself in that tree. You know that life can be a furious enemy. You endure the hits and stand resolute.

You expect the same of your equipment. Scars and stains are expected, but failure is betrayal. Through the wind and rain, your tools must perform. Your livelihood depends on it.

Like that old willow, our own story is one of endurance. Founded a century ago, *Rite in the Rain* Notebooks are still made with the promise that they will survive the elements. Our paper battles wind, mud, rain, sweat, and snow. Through 100 years of arduous use around the world, our products bend but never break.

The notebook that never breaks is the only one that has earned a place in your pocket.

A person wearing a brown jacket is holding a green spiral-bound notebook and a black pen. The notebook has a logo that reads "Rite in the Rain" and "WATERPROOF". The background is a lush forest with green leaves and moss.

SIDE-SPIRAL NOTEBOOKS & KITS

FEATURED PRODUCT

ITEM Nº 973

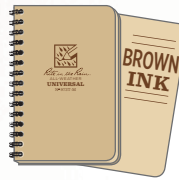

The context of a journal entry is as important as the words written on the page. Before the ink hit the paper, there was a compulsion driving you to commit that thought to your notebook. You made a discovery or had an experience that deserved preservation.

In scientific field work, these moments are abundant.

Biologists, arborists, and geologists make a living examining the mysterious wonders of Mother Nature. They understand the workings of the world and they see that every element, mineral, and animal is on a distinct journey.

When a marine biologist spots a rare species in new territory, or when an ecologist diagnoses the cause of a decline in salmon spawn, they hurriedly reach for a *Rite in the Rain* Notebook to preserve their discoveries. Through harsh conditions in the field and years in storage, neither time nor weather will destroy that note, nor the joy of discovery that inspired it.

HARD COVER BOUND BOOKS

FEATURED PRODUCT

ITEM Nº 390F

Remember that day when the sun made the sweltering air shimmer above the shingles you were laying? That was yesterday. Remember that day when a downpour nearly flooded that new foundation? Of course! That was this morning.

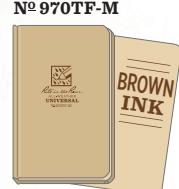

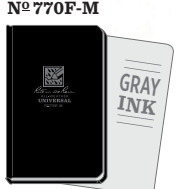

You're no stranger to the fickle temperament of the weather, but you've never been one to let a little drizzle get in the way of a job well-done. Construction workers have deadlines to meet. Season after season, you've been out there against everything Mother Nature could muster.

Of all the rainstorms you've worked through, you'll never forget the one that little yellow book defeated. Your foreman jotted notes into his handbook right through water cascading over its pages, and for every day of work since, you've carried a *Rite in the Rain* book of your own.

Rain and heat will come and go, and you'll be at work on the job site through all of it. You trust your tools, right down to your notebook, to be out there with you.

{ See page 27 }

A man wearing a red beanie and a dark, possibly waterproof, jacket is sitting in a forest. He is holding a yellow field book open and writing in it with a pen. The background is a dense forest with many trees, some of which appear to be charred or blackened, suggesting a forest fire. The lighting is soft, and the overall mood is contemplative and focused.

SOFT COVER BOUND BOOKS

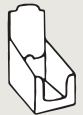

FEATURED PRODUCT

ITEM Nº 374

A small forest fire has scalded a patch of woods in Northwestern Oregon. Blackened husks of trees reach up from the ground like empty, grasping fingers while a heavy rain falls, far too late to be of relief. Among the burnt trees walks an arborist, silently evaluating the damage. He diligently tapes off trees to be removed and makes tallies in his field book.

This forest will grow again. From the black ash will rise new life. The arborist is a caretaker and under his patient gaze, this patch of woods may soon be a viable habitat once again. The arborist wanders this forest through fire and rain, notebook in hand, and shapes its future.

STAPLED NOTEBOOKS

FEATURED PRODUCT

ITEM Nº 311FX

(Stapled notebooks now have a tougher Field-Flex cover.)

Inhabitants of both land and sea, Magellanic penguins at Punta Tombo in Argentina sharply feel changes to either environment. Dr. Dee Boersma of the University of Washington calls them "sentinels", or indicators of environmental change. Changes to penguin behavior can diagnose local, regional, or even global climate trends.

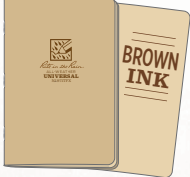

Dr. Boersma and her associates spend the better part of their year on Argentine beaches, closely observing the population of nearly 200,000 Magellanic penguins that inhabit the area. Their lives, deaths, mating rituals, and diets are all monitored and noted. In a cool basement office back at the University of Washington, a 35-year archive of *Rite in the Rain* Notebooks fills several bookshelves. Within the weathered pages of those notebooks is the story of the Magellanic penguin, and a chapter in the story of our planet.

1992 → 1993

BOOK COVERS & POUCH

FEATURED PRODUCT

ITEM N° C540F

Diligence is a duty in construction work. Corner-cutting and haphazard practice can jeopardize a job and risk the safety of the entire crew. As an inspector, attention to detail is your top priority. A missed step in an inspection could endanger the crew or delay the project. With electrical, plumbing, structural, and other considerations at play, your checklists are your lifeline.

Your *Rite in the Rain* hip pouch hangs at your side day in and day out. Home to your notebook, safety handbook, measuring tape, and writing implements, that pouch carries all of your on-the-job essentials. Like you, we don't cut corners. That pouch needs to be on top of its game every day to endure harsh weather and the physical rigor of the job. Snug at your hip, securely storing your vital materials, your *Rite in the Rain* pouch is a trusty sidekick that never lets you miss a crucial detail.

LOOSE LEAF, BINDERS & INDEX CARDS

FEATURED PRODUCTS

ITEM N° 991 & N° C991T

The Red Hot is a popular Tacoma tavern revered for its killer selection of local brews. The Red Hot runs over 30 taps at a given time, each fed by a chilly keg from the cooler room in back. Once a keg expires, a completely new beer takes its place on the line. This system means that there's always new, fresh beer pouring.

The amoebic selection would be impossible for bar staff to manage from memory, so they needed a system that would help them keep it all straight. That's where our All-Weather Index Cards come in. On each keg in the cooler room sits a card labeled with important details about the beer. When a new keg is tapped, its corresponding card is taken up front so that the staff can update the menu and keep a reference handy for each beer on tap.

The Red Hot couldn't settle for cards that would fall apart at the first drop of Wingman Brewers' P-51 Porter. Fortunately, *Rite in the Rain* Index Cards handle the mess. They survive constant transportation from the icy cooler room to the sticky bar. Rogue hot dog toppings and spilled beer shake right off.

It's a beautiful system, and our gritty index cards are the heart of it all.

WRITING INSTRUMENTS

FEATURED PRODUCT

ITEM N° 94S

Dusty beams of light spill in from the windows and the sour perfume of fresh-cut lumber looms in the air. The workbench is cluttered but intentional. The tools are beaten but functional.

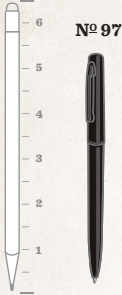

Fluorescent bulbs hum, a radio whispers, and a carpenter pensively reviews photographs sent from a client.

As he flips through his tablet, the carpenter notes the colors and textures of the space and jots ideas into a dusty spiral notebook. He stands up and runs his fingers across boards of oak, cherry, and maple before drawing out a thick plank of walnut.

A month from now, that raw, sinewy wood will have become a centerpiece table at a local restaurant. Countless hours of craftsmanship will have cut, shaped, and sanded it into something new, beautiful, and functional. What was once merely an idea became a sketch. That sketch became a build. That build became a masterpiece. Through every step of that journey, a *Rite in the Rain* Pen was tucked into the carpenter's pocket, reliably playing its small part in bringing an idea to life.

PRINTER PAPER & SAMPLES

FEATURED PRODUCT

ITEM Nº 8511

The stony shores of Washington State are ceaselessly pounded by Mother Nature. Shifting tides, crashing waves, and heavy rains fall upon Washington beaches, grinding rocks into smooth spheres like those underfoot of the dock workers that tend to state's coastal infrastructure.

These individuals are the backbone of coastal commerce and transit up and down Western Washington. Demand for their sensitive work does not relent. To keep docks in working condition and ferries operating on-schedule, these workers will tirelessly endure the same brutal wind and rain that bombards the weathered rocks they stand upon.

Rite in the Rain paper is a trusted tool to these coastal workers. Through storms, squalls, and dreary winter days, *Rite in the Rain* paper performs diligently and reliably, protecting the sensitive checklists that govern their work.

PLANNERS & CALENDARS

FEATURED PRODUCT

ITEM Nº 9255T-MX

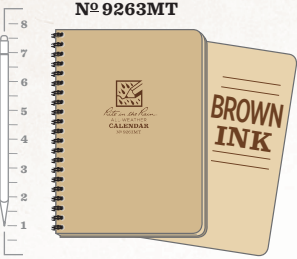

To execute a vision requires focus. A blank slate does not become a masterpiece in a day. Your daily efforts are just a small gear slowly turning a giant wheel of progress.

Through ebbs and flows of motivation, there is a rule you do not break: if it is written, it shall be done. That's why you write a short list of modest goals for every day into your *Rite in the Rain* Planner and regard them as law.

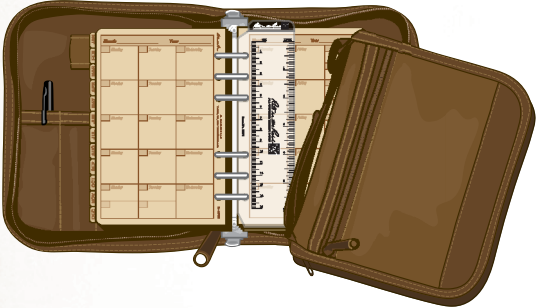

Substantial, professional, and without compromise, your *Rite in the Rain* Planner holds you accountable to your vision. As weeks pass, those many revolutions of your daily grind will soon yield the full scope of your ambition.

ITEM N° 980T

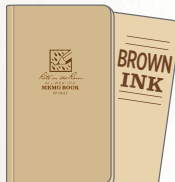

The men and women of our armed forces did not simply "become" soldiers. Whatever their assignment, they were trained for it. They were tested physically. They were pushed beyond expectations of their ability. They were honed for the job, and they earned their title through sweat and rigorous study.

Rite in the Rain Notebooks didn't just "become" the toughest All-Weather books out there. They earned the title. They have been field-tested by members of our military around the world. Through boot camp, dust storms, typhoons, marches, and battles, our notebooks have held fast and proudly represented the *Rite in the Rain* name.

ITEM N° 104

A break in the case is seldom a result of blind luck. Evidence might come to light after taking a second look at photos from the scene. Bits of witness testimony might line up to point you in the right direction. A nearby security camera might identify the culprit. A break may come in the form of a sudden epiphany, but that epiphany would be impossible without exhaustive investigative work that preceded it.

There's a rhyme and a reason for everything you do as an investigator. There are laws and procedures to be followed. You record every detail, because you can never be sure which one will be the linchpin of your case. Your *Rite in the Rain* Field Interview Notebook is a staple of every interview, helping you ask all the right questions to close the case.

*"Feel the city breakin' and everybody shakin',
and we're stayin' alive, stayin' alive..."*

In the acquisition of any skill, there is a gradual progression from incompetence to mastery. The final hurdle is the transition from "conscience competence" to "unconscious competence" - with enough study and repetition, the skill will be automatic. Clearing this hurdle is crucial for CERT practitioners. In a crisis, calmness and unconscious competence in CERT skills could save countless lives.

Whether performing chest compressions to the rhythm of the Bee Gee's or treating a hypothermic patient, a skilled CERT practitioner will rise to the challenge of a community crisis. *Rite in the Rain* CERT materials were made for these heroes. Even in brutal conditions, our CERT books will be ready to refresh important CERT principles or document emergency procedures.

Should crisis strike, a prepared CERT member and their *Rite in the Rain* materials could keep everybody "Stayin' Alive".

FEATURED PRODUCT

ITEM Nº 157

Contractors live in pursuit of tools that simply perform. A hammer should always be able to drive a nail. A drill should always be able to make a hole. A notebook should always be able to be written upon. Bad weather and fickle working conditions don't change the fact that work needs to get done, so why accept equipment that makes exceptions?

Rite in the Rain Notebooks are right at home in a tool belt. Extremely durable and filled with your time-tested handyman wisdom, your notebook is as handy a tool as your flathead screwdriver. Through sweat, grime, mud, and rain, *Rite in the Rain* is a loyal and reliable companion.

products for
AGRICULTURE

FEATURED PRODUCT

ITEM Nº 1631

Animals are your livelihood. From your prized Simmental bull to the Saanen goats grazing your property, each animal has distinct dietary, medical, social, and environmental needs. You treat each animal under your care with respect, and at the end of the day, your sound practice will be rewarded. Healthy and happy animals produce better, breed better, and live longer.

You roll out of bed at the first glimpse of dawn, fix a cup of coffee, and wander over to the barn in the early purple light. An expecting heifer raises her head to greet you. At 250 days along, she's late in her gestation cycle and you've closely monitored her diet. You reach over the fence with a handful of hay for her and mark her progress in your *Rite in the Rain* Cow Breeding Record Book, counting down the days until she delivers a healthy, thriving calf to join your herd.

ITEM N° 512

Despite the beauty of this high-altitude wilderness, you're not here to sightsee. Summitting expeditions are not casual affairs; they require planning, allocation of resources, and close observation of the fickle weather. These clear skies could quickly darken and growl with thunder, and if they do, the meticulous notes in your *Rite in the Rain Expedition Journal* will help you safely adjust your ascent plan.

ATHLETICS

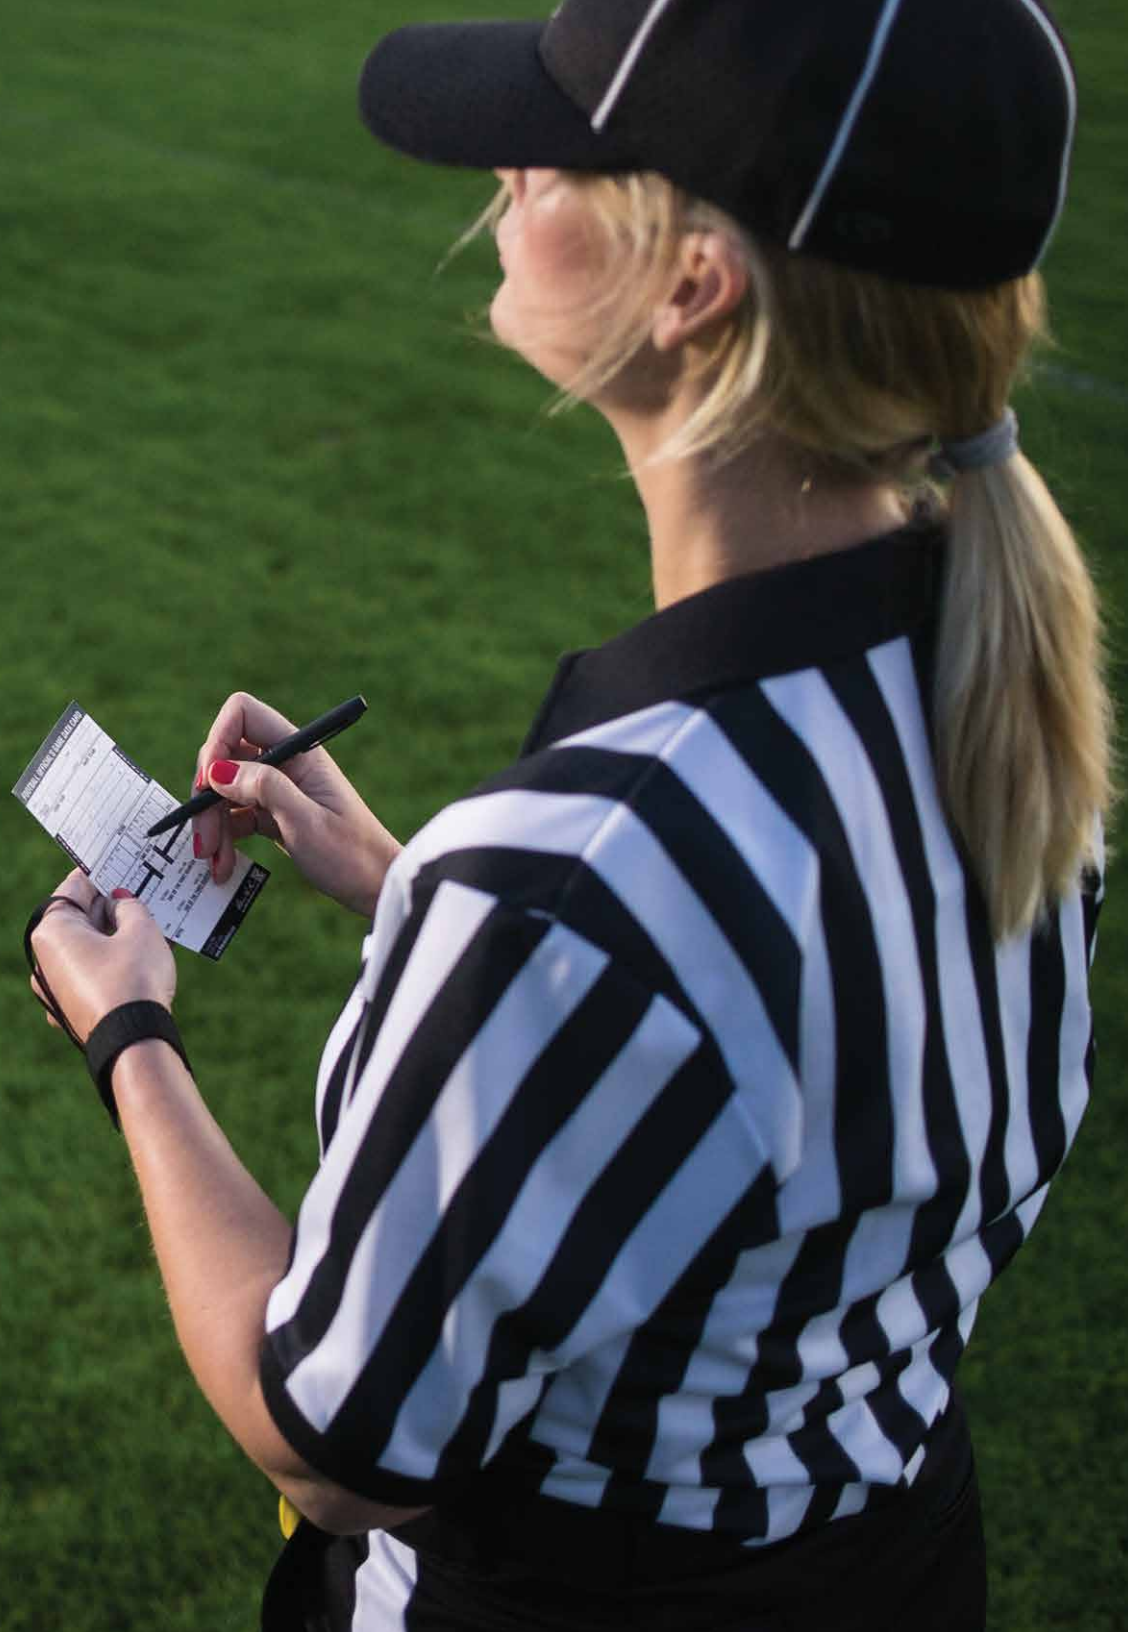

FEATURED PRODUCT

ITEM Nº 881

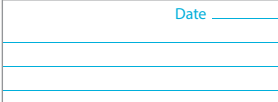

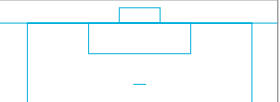

Every time you throw that shirt on, you know you're in for it. Tonight has been no exception. You've been lambasted all game since you spotted that fourth-down run a few inches short of the stick. The runner dragged his knee on the muddy turf before lunging for the first down, but that doesn't seem to matter to the fans. They're rabid with fury, and you're the scapegoat.

They don't know that you've done this so long that the bloodthirsty roar behind you simply blends into a pleasant static in your head. Despite the chilly rain and the hostile crowd, your focus is unbroken and your objectivity is uncompromised. When you spot #57 line up uncovered, you check your *Rite in the Rain* Football Referee Card and note that he did not report as eligible. As your hand reaches for your flag, the crowd seethes behind you.

You have a job to do. Let it fly.

DURA *Rite*
WATERPROOF

products for
UNDERWATER

FEATURED PRODUCT

ITEM N° 673

The coastal waters of the Pacific Northwest are icy and powerful. The ocean perpetually grinds Washington's rocky shores. You watch as wave after wave blasts the sea stacks looming offshore and envision a dark wasteland under the surface. Don't let the frigid and turbulent water deceive you: the foamy surface is only a curtain obscuring a new world.

What a world it is. Seals, octupi, salmon, and crabs call this place home and dart through the water around you. Beautiful tendrils of aquatic plants sway with the tides on the ocean's floor. One hundred feet below the surface, you sketch this world into a *DuraRite* Notebook made for these chilly depths. Your notes from this dive will preserve the memory of this unfamiliar world for a lifetime.

MADE IN TACOMA
— SINCE 1916 —
Rite in the Rain
— DEFYING MOTHER NATURE —

Rite in the Rain is a wood-based, recyclable paper. But, unlike plain paper... it won't turn to mush when exposed to:

USE WET OR DRY
Wood-based paper won't absorb water!
• ALL PENCILS
• RITE IN THE RAIN PENS
• WAX MARKERS
• CRAYONS

WHEN DRY ONLY
What you write won't wash off!
• PERMANENT MARKERS
• STANDARD BALLPOINTS

WON'T WORK
Water-based ink washes off! (don't)
• GEL PENS

WHAT to write with?

for **BEST results**

Pre-Loaded DISPLAYS

Perfect for displaying your favorite *Rite in the Rain* products, these natural kraft corrugated displays are built to accommodate numerous product combinations. It's easy to arrange everything from *Rite in the Rain* Field Books to Copier Paper, and everything in-between.

Pre-loaded displays ship assembled • Removable header card for shallow shelving • Inner-pack product boxes fit on the display shelves

Purchase pre-loaded displays (as shown) or receive FREE empty displays with any minimum reseller purchase (see pg 71).

A close-up, over-the-shoulder shot of a police officer sitting in the driver's seat of a vehicle. The officer is wearing a dark uniform with a 'POLICE' patch on the sleeve and a blue watch. They are holding a black pen and writing in a small, spiral-bound notepad. The notepad has handwritten text: 'ID THEFT', 'FARMER', 'CHECKING ACCOUNT', and '\$1,500'. The car's dashboard and center console are visible on the left side of the frame.

Rite in the Rain pens are made to function without excuse in any weather. Our pressurized ink is rated to work in extreme temperatures and even upside-down. Rough conditions are nothing new to police - they're challenged by bad weather every day. Dealing with rain and snow is just part of the job in many parts of the country. When writing down critical witness testimony or logging crucial evidence, cops call on our All-Weather Pens to perform reliably at all times, even in challenging weather.

*"An impenetrable wilderness of lofty trees, rendered nearly impassable
by the underwood, which uniformly encumbers the surface"*

— George Vancouver on the Puget Sound, 1792

19th-century Western Washington was a jewel hidden beneath a canopy of towering evergreen forests, and it was the heart of the American lumber industry. Mighty Washington timber fueled the California Gold Rush of 1849 and the completion of the Northern Pacific Railroad by 1883. Timber surveyors would use tally books to assess timber yield on their plots, but the capricious Pacific Northwestern weather would routinely get the better of their hard-earned survey notes.

In this problem, entrepreneur Jerry Darling saw an opportunity. Working in a small shed on his property with his wife, Mary Darling, Jerry hand-dipped sheets of paper in a waterproofing solution that would endure the region's prodigious precipitation. By the 1930's, these primitive books had begun to make their way around the Northwest and into the hands of hard-working outdoorsmen.

1942 U.S. Navy Shipfitter Jack T. Owens toiled as a welder and pipefitter for 12th Naval Construction Battalion — a scrappy group known to history as the "Seabees". Owens was stationed in the Klondike region of Alaska and worked to prepare ships for deployment to the Pacific Theater of WWII. His days spent working on naval craft in fickle Alaskan weather are well-chronicled in a "Rite in the Rain" Field Book made by the J.L. Darling Corporation of Tacoma, Washington.

1953 Engineer Franklin Nielson addressed a letter with a single dollar enclosed to the J.L. Darling Corporation, asking if they could send along a \$2 pack of All-Weather Loose Leaf Paper, promising that he would send the remaining balance from the next week's paycheck. Nielson added, "In Seattle or Alaska, the humidity is so excessive that sweat just rolls off, and sometimes right onto the notebook. Your paper is the answer to a surveyor's prayer."

1964 Columbia River Bridge Engineer Web W. Ballinger wrote a letter to the J.L. Darling Corporation enclosing three sheets of damaged, but legible, notebook paper. "These sheets were on a clip board that was lost in the river on July 15 this year. On November 2, it was recovered. It had been in tidal salt water at least half of the time and was near a raw sewage outfall all of the time. We were very impressed with the way that the penciled notations remained completely legible after two and a half months."

1985 Archaeologist Jeanne Schaaf sent in a letter along with a weathered *Rite in the Rain* Notebook. "While conducting an archaeological survey at Kuzitrin Lake, on the Seward Peninsula of Alaska in July of 1985, we found this notebook lying exposed on the surface of the lake terrace. After 12 years of exposure to the wind, rain, and other elements of weather, these notes were still legible!"

100 years after Jerry and Mary made their first Waterproof Timber Cruiser's Books, *Rite in the Rain* products have explored the far reaches of the world. They have scaled Everest in the hands of an elite alpinist. They have logged research on ancient crustaceans frozen into the ice of Antarctica. They have shielded a U.S. Army private from grenade shrapnel at war in Afghanistan. Through harsh conditions and the ruthless passage of time, *Rite in the Rain* products have now endured for a century.

Rite in the Rain
— DEFYING MOTHER NATURE —
SINCE 1910

A. World War II Journal – 1942

Still intact, Navy "Seabee" Jack T. Owens' *Rite in the Rain* Field Book, contains daily accounts of life during the War.

B. Oregon State Highway Department Form – 1964

Sent in by Web W. Ballinger, these sheets of *Rite in the Rain* survived months of exposure after being dropped overboard, from salt water to sewage.

C. Timber Cruiser's Estimate Book – 1916

An original notebook from Jerry Darling's workshop.
