SINCE 1963

ATLANTIC ULTRAVIOLET CORPORATION®
Since 1963, Atlantic Ultraviolet Corporation® has pioneered the discovery and development of beneficial uses of ultraviolet energy. Over the years these efforts have led to the development of valuable, cost effective and environmentally sound techniques and products now known and respected throughout the world.

The UV Application Specialists at Atlantic Ultraviolet Corporation® assist customers in the selection of germicidal lamps and equipment. Their specialized knowledge is a valuable resource in formulating effective and cost-conscious ultraviolet solutions.

Extensive inventories and a dedicated staff enable Atlantic Ultraviolet Corporation® to fulfill its commitment to provide fast deliveries and responsive customer service.

Ultraviolet is a unique and rapid method of disinfection. It utilizes germicidal ultraviolet lamps producing short-wave radiation at 254 nanometers (nm)—a wavelength highly lethal to bacteria, virus, and other microorganisms.

An ever growing range of industries and consumer applications have found ultraviolet to be the ideal solution for their air and surface treatment needs.

Atlantic Ultraviolet Corporation® equipment and systems are manufactured in the USA.
**ADVANTAGES**

**Efficient**
High efficiency Surelite™
Electronic Ballasts power up Sanidyne® Ultraviolet Portable Area Sanitizers.

**Straightforward**
Simple use and maintenance.

**Fast**
A room as large as 1,000 square feet can be treated in 15 minutes.
(Larger spaces require more time, see charts on page 14–15.)

**Effective**
Disinfects both air and exposed surfaces utilizing germicidal ultraviolet (UV-C) wavelength lamps.

**Durable**
Polished Stainless Steel.

**Portable**
Fixture is easily transported from one area to another.

**Safe**
Sanidyne® Prime Remote, Sanidyne® Plus, and Sanidyne® Premium have occupancy sensors to prevent encroachment incidences.

**Easy to Use**
Fixtures are controlled via electronic keypad.

---

**PRINCIPLE OF OPERATION**

The Sanidyne® Ultraviolet Portable Area Sanitizers have been carefully conceived to provide germicidal UV disinfection for purifying air and exposed surfaces in an unoccupied area by means of 8 germicidal ultraviolet lamps. These special lamps generate high levels of germicidal ultraviolet radiation lethal to infectious microorganisms such as bacteria, mold, and virus.

The ultraviolet disinfection dosage is a function of time and intensity to which the air and surrounding surfaces are exposed. Our UV Application Specialists would be happy to perform the necessary calculation to ensure the sanitizer we provide is appropriate for your particular application.

The operation of the Sanidyne® is as follows:

1. Clear room of all occupants (Sanidyne® can only be used in unoccupied areas). Affix warning signs (included) onto all doors of the room that is to receive the Sanidyne® disinfection.
2. Treatment time is set, start button engaged, built-in 1 minute, 30 second delay allows time for operator to leave area.
3. Ultraviolet rays are projected within the unoccupied area, for the programmed period of time.
4. The air and exposed surfaces within the room are disinfected. The infectious microorganisms such as bacteria, mold, and virus are inactivated.
5. The Sanidyne® treatment cycle ends. Its compact size and lightweight design allows it to be easily moved to the next location that needs disinfection.
Sanidyne® Prime Ultraviolet Portable Area Sanitizer

**STER-L-RAY® High Output Germicidal Ultraviolet Lamps**
Specially designed high output lamps provide the utmost in quality, sustained output, and longevity (see page 12 for information). ArmorLite™ Safety Shield is a protective envelope applied to the germicidal lamps. It provides increased security by eliminating the dangers associated with broken lamps.

**Lamp Guard**
Stainless steel cage that protects STER-L-RAY® lamps.

**Stainless Steel Construction**
Manufactured in Type 304 stainless steel for unparalleled strength, durability, and an attractive finish.

**Surelite™ Ballasts**
State-of-the-art electronic ballasts specifically developed for the operation of ultraviolet lamps. Versatile, programmed start ballasts provide high lamp output; are lightweight, efficient, and operate cool for longer life.

**Zenith™ UV-C Detector** (optional)
The Zenith™ UV-C Detector is a sensitive hand-held, self-contained battery operated ultraviolet meter that can be used for:
- Monitoring UV-C Germicidal Lamp Intensity & Aging
- Measuring UV-C Germicidal Fixture Leakage

**24-Hour Interval Timer**
Easy programmable timer allows treatment time to be customized to room size.

**Observation Ports (4)**
Located on top of the Sanidyne® Prime, these ports allow inspection of the lamps with storage cover on, without the risk of ultraviolet exposure.

**Steadfast™ Bayonet Socket Mount Lampholders**
Bayonet Socket Mount four-pin lampholders fasten each lamp securely while providing convenient, “quick and easy” lamp change.

**Promate™ Face Shield** (not shown, 1 supplied with this model)
Lightweight visor with adjustable headgear provides eye and face protection from germicidal UV rays.

**Promate™ Safety Glasses** (optional) Safety eyewear should be used as general-purpose safety protection and for additional shielding from germicidal UV rays.

**Promate™ Warning Signs (2)**
To be affixed to entry door(s) to warn that an ultraviolet sanitizer is in use and that the treatment area should not be entered. Sanidyne® Prime is for use only in unoccupied areas.

**1-Minute and 30-Second Audible Exit Warning**
After start button is engaged, an audible warning sounds for 1 minute and 30 seconds, allowing operator time to leave the area before disinfection cycle begins and ultraviolet lamps are switched on.
SPECIAL FEATURES

Promate™ Elapsed Time Indicator
Real-time, non-resettable display of accumulated operating hours.

Cord Wrap
Convenient cord storage when Sanidyne® Prime is not in use.

Transport Handle
Provides substantial grip when moving Sanidyne® Prime.

Removable Rigid Storage Cover
Made of polished stainless steel to protect the STER-L-RAY® Germicidal Ultraviolet Lamps from breakage while transporting and/or storing the Sanidyne® Prime and allows inspection of lamps in operation.

**GENUINE STER-L-RAY® GERMICIDAL LAMPS**

**STER-L-RAY®** Germicidal Lamps are short-wave, low pressure tubes that produce ultraviolet wavelengths lethal to microorganisms. Approximately 95% of the ultraviolet energy emitted from **STER-L-RAY®** germicidal lamps is at 254 nanometers, the region of germicidal effectiveness most destructive to bacteria, mold and virus.

**STER-L-RAY®** High Output (HO) Germicidal UV Lamps are similar in size and shape to conventional germicidal UV lamps but are capable of operating at higher UV output. The HO lamps yield more UV watts than standard UV-C lamps of the same length.

**STER-L-RAY®** Enhanced Output Amalgam Lamps provide germicidal ultraviolet output three or more times than that of conventional germicidal lamps of similar length without sacrificing efficiency or lamp life. **STER-L-RAY®** Enhanced Output Amalgam Lamps are the highest expression of ultraviolet lamp technology and as such are the subject of ongoing technical development and improvement. Custom and proprietary designs are available to satisfy specialized needs.

ArmorLite™ protective coating is applied to **STER-L-RAY®** Germicidal Lamps in all Sanidyne® models, ensuring protection for employees, products, and work environments by eliminating the dangers associated with broken lamps.

**STER-L-RAY®, ArmorLite™, Sanidyne® Prime, Sanidyne® Prime Remote, Sanidyne® Plus, Sanidyne® Premium,** and their appropriate logos are trademarks of Atlantic Ultraviolet Corporation®.

**CAUTION:** Exposure to direct or reflected germicidal ultraviolet rays will cause painful eye irritation and reddening of the skin. Personnel subject to such exposure must wear suitable face shield, gloves and protective clothing.

Hg - LAMP CONTAINS MERCURY, manage in accord with disposal laws, see: LampRecycle.org.

**APPLICATIONS**

Sanidyne® Ultraviolet Portable Area Sanitizers disinfect air and surfaces in unoccupied areas by means of 8 STER-L-RAY® Germicidal Ultraviolet Lamps. The STER-L-RAY® lamps generate high levels of germicidal ultraviolet radiation lethal to bacteria, mold, virus, and fungi. The compact size and lightweight design of Sanidyne® Portable Area Sanitizers conveniently allows them to be moved from one location to another, providing disinfection wherever and whenever necessary.

Typical applications for the Sanidyne® include: Operating Rooms, Patient Rooms, Laboratories, Clean Rooms, Open Work Space, Homeless Shelters, Auditoriums, Hotel Rooms, Gymnasiums, Morgues, Open Office Areas, or areas where permanently mounted fixtures are not an option.

The Sanidyne® Ultraviolet Portable Area Sanitizers do not require professional installation. Access to the room must be avoided when Sanidyne® is in operation.

Note: Dose shown above is expressed as mJ/cm² (millijoule per square centimeter).
