

RAINFALL-C II SERIES

GLAZED CERAMIC WALL TILE

tierra sol

The calm before, the misty buildup, and the torrent of the storm's deluge are the inspiration for this modern collection of ceramic wall tile collection, Rainfall-C II.

This deceptively simple, opaque glazed wall tile provides nearly infinite possibilities for combination between the flat and textured fields and complimentary colour choices.

The modern stretched subway size contrasts wonderfully with the naturally inspired textures and subtle earth toned palette to create an inviting yet refined backdrop for any space.
