ENGINEERING LUXURY TO LAST

Whether in luxury high-rises or boutique venues,
McGuire Special Finishes for plumbing fixture trim
products elevate the design of any commercial space,
offering timeless elegance that lasts a lifetime.

MATTE BLACK

Its sleek, velvety texture adds a modern touch while maintaining a timeless appeal, making it the perfect complement to both contemporary and classic design styles. Matte black offers a sophisticated look that resists fingerprints and smudges, ensuring your fixtures remain as pristine as they are stylish. Whether used in a bold, monochromatic setting or as a striking contrast, a matte black finish brings refined luxury and lasting beauty to any space.

POLISHED BRASS

A polished brass finish creates a sense of luxury and opulence, instantly elevating the aesthetic of any space. Its warm, radiant tone captures light beautifully, creating a striking focal point. Polished brass finishes seamlessly blend with both traditional and modern design styles, offering a timeless quality that never goes out of fashion. Whether used to accent a minimalist setting or enhance a more ornate décor, a polished brass finish adds a touch of refinement and grandeur.

A FULL-RANGE OF FINISHES FOR DESIGN FLEXIBILITY

McGuire Special Finishes offer high-quality, enduring luxury designed to leave a lasting impression. Our unique, high-contrast palette features eight upscale finishes.

OUR PROCESS

Depending on the finish and color, McGuire uses either Physical Vapor Deposition (PVD) plating or powder coating. PVD is a vacuum-based, molecular technique that creates a thin, hard coating that can improve a fixture appearance, durability, and performance.

OUR FINISHES

PVD

Brushed Stainless (BSPVD)

Brushed Gold (BGPVD)

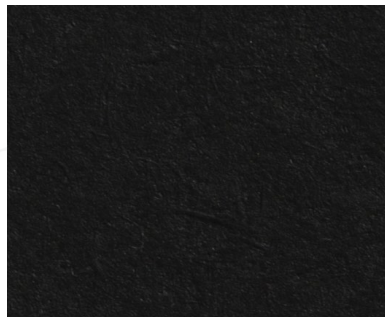

Brushed Nickel (BNPVD)

Polished Nickel (PNPVD)
