### SKIN TYPE

All skin types

### PURPOSE

This intensive eye cream incorporates peptides and botanical extraction technology to smooth, hydrate and refine the delicate area under the eyes. Natural emollients and cushioning esters hug the contours of the skin to revitalize and smooth.

### BENEFITS

*Hesperidin Methyl Chalcone, Dipeptide-2, Palmitoyl Tetrapeptide-3*  
Helps reduce under eye bag volume by decreasing capillary permeability, improves lymphatic circulation (thereby helping to eliminate built up toxins) and improves firmness and elasticity

A cascading antioxidant that helps eliminate free radicals and their damage to the skin, gives the skin a brighter and even-toned look and helps maintain younger-looking skin

Provides delicate eye area with unparalleled phyto-extracts and antioxidants

Complex that improves hydration and moisture-levels; helps hydrate skin for up to 24 hours

Humectant, regulating the level of hydration of skin; forms a moisturizing, non-occlusive layer of moisture on skin

Helps to remineralize the delicate skin around the eyes; anti-inflammatory and astringent properties

Known for its ability to aid in capillary constriction

A new ingredient to help fill in existing fine lines and promote the restructuring of a fully functional dermis enabling the skin to resist shearing stress responsible for the formation of wrinkles

An antioxidant complex that provides immediate moisturization to the skin, improves skin moisture levels with continued treatment, and offers antioxidant protection

An essential antioxidant found in every living cell, energy source for new cells, smoothes and firms skin
