Nilfisk Dryft

Scrub is the new mop

NILFISK

Revolutionize the way you clean small spaces with Nilfisk Dryft.

The Nilfisk Dryft micro scrubber effortlessly cleans hard-to-reach areas, including congested spaces, corners, edges, narrow gaps, and around obstacles. More hygienic than a traditional mop and as compact as a stick vacuum, Nilfisk Dryft provides a deeper clean across the entire floor.

One scrubber.
So many benefits.

Low profile

With a patented ultra-low profile, the head can clean underneath partitions and furniture as low as 2 inches.

Hard to reach areas

Its patented head shape and agility allow the Nilfisk Dryft to clean tight spots quickly, including around toilets, in seconds.

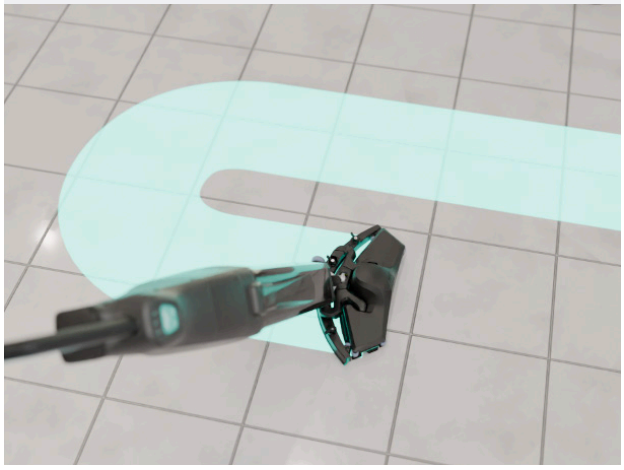

Corner cleaning

Nilfisk Dryft scrubs and dries deep into corners, thanks to the chamfered edges on the cleaning head.

S-motion

The S-motion, similar to swinging a mop, covers more ground with fewer steps, making cleaning faster and more efficient.

Make light work of daily cleaning.

Almost no training required. Simple to use and ergonomically designed, the lightweight Nilfisk Dryft is also easy to handle and transport.

- Easily transportable at 16 lbs. empty and 19 lbs. with a full tank.
- Magnetic brush pad for quick cleaning and replacement.
- Quick-release squeegee with a tool-free design for simple maintenance.
- Anti-slip rotating handle for comfort and control.
- Low noise operation.
- Simple three-button control board with easily adjustable settings.

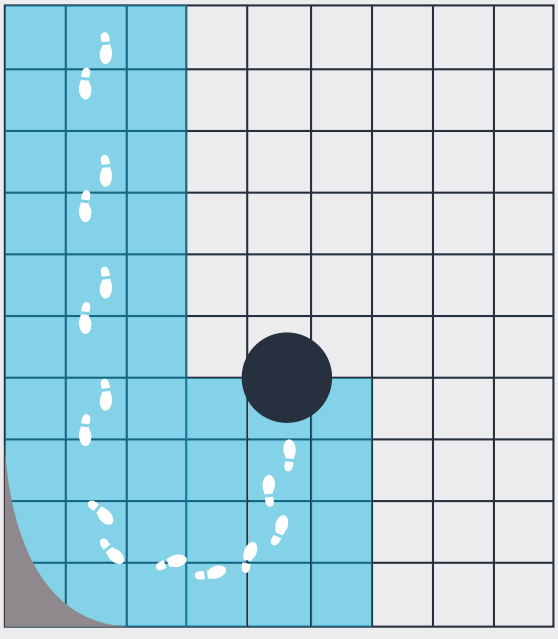

Twice as fast as traditional machines, with no time to dry.

Thanks to the 'S-Motion' of the Nilfisk Dryft, 100% of tricky areas can be cleaned faster, with 75% less walking. Agile and flexible, it glides side to side like a mop reducing cleaning time compared to traditional walk-behind machines.

Walk-behind machine

The user has to walk up and down the space 4 times, taking around 20 seconds each time.

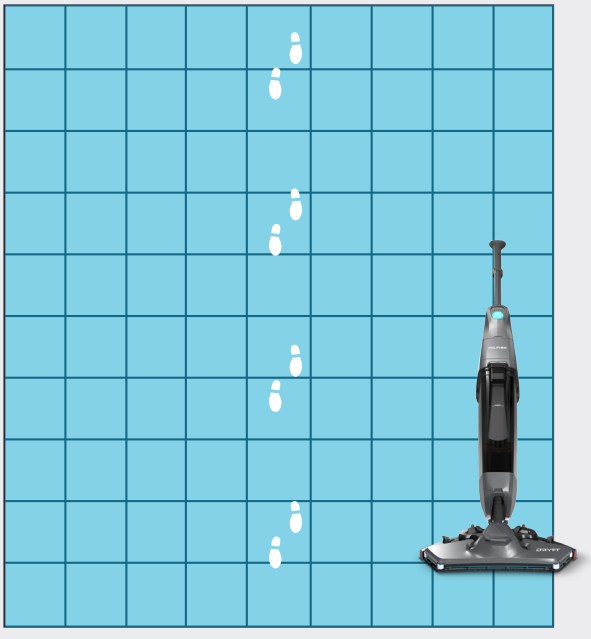

5 ft (1.6m)

Nilfisk Dryft

The user only needs to walk up and down the space twice, taking about half the time of a traditional walk-behind machine.

5 ft (1.6m)

You can count on a cleaner clean.

Unlike traditional mops that are repeatedly dunked into a dirty bucket, Nilfisk Dryft doesn't spread harmful bacteria - it removes it.

The shape of things to come

The unique orbital deck removes dirt much more efficiently than a traditional mop, resulting in a visibly cleaner floor.

Enhanced protection

By picking up all the dirty water, the Nilfisk Dryft is proven to clean more effectively than manual methods, ensuring there's no spread of dirt and bacteria across the floor like a mop.

Top performance with fewer interruptions.

With 4,200 oscillations per minute and the ability to operate continuously, the Nilfisk Dryft offers potential for uninterrupted performance with its interchangeable lithium-ion battery.

Cover more ground, use less water.

The orbital scrub head uses water more effectively, requiring only 1/3 the water of comparable products. The narrow solution tank can be refilled in any sink.

Small spaces are everywhere.

Whether you're a small and medium-sized enterprise or a large multi-national, the Nilfisk Dryft micro scrubber will fit right in.
