PRODUCT DESCRIPTION

Intended to prevent splash of liquids and dust from coming in contact with the individuals mouth, nose and eyes. Typically used between health professionals and patients, however it can also be used in a variety of industries to provide protection. To use the shield, remove the film protection layer attached to the lens and put mask on directly.

APPLICATION NOTES

Avoid touching the center of the shield as much as possible to prevent distorting vision. One time use only. We recommend you do not share your shield with any other individual. Face shields should be stored in a dry, well ventilated clean environment. Use only against liquids or dust. This shield is not impact resistant. Do not use as protection against open flame or sparks.
