
RECYCLING DIAGRAM

— for —

J. L. DARLING PRODUCTS

Rite in the Rain is a wood-based paper product that is to be recycled with regular office paper stock. No special recycling process needed.

Polydura is a polyethylene product used on many notebook covers. It can be recycled in any residential or commercial plastics recycling program that accepts this classification.

DuraRite is a tear resistant synthetic stock made for extreme conditions or underwater use. Look for the “5” logo when seeking the correct recycling outlet.

DuraCopy is a tear resistant synthetic laser printer stock made for extreme conditions or underwater use. It can be recycled in any residential or commercial plastics recycling program that accepts this classification.

WeatherJet is a tear resistant synthetic ink-jet printer stock made for all outdoor or underwater uses. Look for the “7” logo when seeking the correct recycling outlet.
