Since 1963, Atlantic Ultraviolet Corporation® has pioneered the discovery and development of beneficial uses of ultraviolet energy. Over the years these efforts have led to the development of valuable, cost effective and environmentally sound techniques and products now known and respected throughout the world.

The UV Application Specialists at Atlantic Ultraviolet Corporation® assist customers in the selection of germicidal lamps and equipment. Their specialized knowledge is a valuable resource in formulating effective and cost-conscious ultraviolet solutions. Extensive inventories and a dedicated staff enable Atlantic Ultraviolet Corporation® to fulfill its commitment to provide fast deliveries and responsive customer service.

Ultraviolet Disinfection is a unique and rapid method of disinfection without the use of heat or chemicals.

MEGATRON® Ultraviolet Water Disinfection Systems utilize germicidal ultraviolet lamps that produce short-wave radiation that is lethal to bacteria, viruses and other microorganisms present in water.

Economical and safe, MEGATRON® Ultraviolet Water Disinfection Systems offer rapid disinfection without the use of heat or dangerous chemicals – often for the lowest cost available by any means.

An ever-growing range of industries and consumer applications have found ultraviolet to be the ideal solution for their water treatment requirements.

Awareness of the environmental impact of chemical disinfectants and evolving discharge regulations have made ultraviolet purification a technology of choice in water recycling and disinfection of processed wastewater discharges.
PRINCIPLE OF OPERATION

ADVANTAGES

Effective
Virtually all microorganisms are susceptible to MEGATRON® ultraviolet disinfection

Economical
Hundreds of gallons are purified for each penny of operating cost

Safe
No danger of overdosing, no addition of chemicals

Fast
Water is ready for use as soon as it leaves the purifier – no further contact time required

Easy
Installation and maintenance are less complicated than other methods

Automatic
Provides continuous disinfection without special attention or measurement

Chemical Free
No chlorine taste or corrosion problems

Versatile
Capacities available from seventy to thousands of gallons per minute (GPM)

Model M90
(Contains 7 Lamps)

Ultraviolet Rays

Germicidal Lamp in Quartz Sleeve

Inlet

Outlet

Sight Port

Wiper Rod

Transparent Quartz Sleeve

Wiper Segments

Stainless Steel Wiper Rod

Wiper Travel

1. The water enters the stainless steel disinfection chamber and flows into the space between the quartz sleeves and chamber wall where suspended microscopic organisms are exposed to intense shortwave germicidal ultraviolet radiation.

2. Translucent sight port and front panel indicator lights (not shown) provide positive indication of germicidal lamp operation.

3. Manual or automatic wiper system facilitates routine cleaning of quartz sleeves without disassembly or shutdown of disinfection systems.

4. Water leaving the purifier is instantly ready for use.
SPECIAL FEATURES

Modular Design
Each MEGATRON® is a completely self-contained disinfection system. The electrical enclosure and disinfection chamber form an independent model simplifying installation; simply secure, plumb and supply suitable single-phase power. Multiple models can be interconnected to comply with nearly any flow requirement.

All internal electronic modules can be removed and replaced, simplifying troubleshooting, and reducing any possible down time.

Surelite™ Electronic Ballasts
State-of-the-art electronic ballast specifically developed for the operation of ultraviolet lamps. Versatile ballast provides high lamp output; is lightweight, efficient, and operates cool for longer life.

Manual Wiper System
Permits mechanical cleaning of the quartz sleeves without service interruption, or disassembly of the system.

Automatic Wiper System (Optional)
Once programmed, permits unattended mechanical cleaning of the quartz sleeves.

Sight Port
Translucent plug mounts to the disinfection chamber and provides positive indication of germicidal lamp operation.

CRYSTAL CLEAR™ Quartz Sleeve
Fused, high quality quartz, protects and insulates the ultraviolet lamps to ensure high output over a range of operating temperatures.

Remote Outputs
12v DC: Provides an output corresponding to the MEGATRON® STATUS and power for a low-voltage audio alarm, 50mA max.

4-20mA
Provides an output corresponding to the ULTRAVIOLET INTENSITY. Output must be displayed by a PLC, computer, or 4-20mA meter, which can interpret the signal.

Dry Contacts
Provides SPDT output corresponding to UV NORMAL or FAULT status of the monitor. Contacts are rated at 50v 100mA max.

Lamp Operation Indicators
Provide positive indication of each germicidal lamp’s operation.

Digital GUARDIAN™ Ultraviolet Monitor
Displays the intensity of germicidal ultraviolet energy within the disinfection chamber. Signals are provided by the Ultraviolet Sensor Probe.

Promate™ Elapsed Time Indicator
Non-resettable display of accumulated operating hours.
**Electrical Enclosure**
A NEMA style enclosure, fabricated from stainless steel type 304. All electronics are accessible through either of the access doors. System status is viewed through the status display window of the front access door.

**Disinfection Chamber**
Made from stainless steel type 316, all internal and external surfaces are passivated, exterior is also electropolished. Integral drain fittings allow for in-place drainage.

**STER-L-RAY® Instant Start Germicidal Ultraviolet Lamps**
Specially designed lamps are instant starting and provide the utmost in quality, sustained output and longevity. (Not Shown – Inside Chamber.)

**Sampling Ports**
Located on the inlet/outlet and allow inline sample gathering, monitoring or other user specific requirement.

**Chamber Head Plates**
Made from stainless steel type 316, passivated and electropolished, and are removable allowing access into the chamber.

**Ultraviolet Sensor Probe**
Mounts to the disinfection chamber, senses the intensity of germicidal ultraviolet energy that penetrates the quartz sleeve and water within the disinfection chamber.

**OPTIONAL ACCESSORIES**

**Promate™ Safety Glasses**
Safety eyewear should be used as general-purpose safety protection and for additional shielding from germicidal ultraviolet rays.

**Promate™ Face Shield**
Lightweight visor with adjustable headgear provides eye and face protection from germicidal ultraviolet rays.
ULTRAVIOLET DOSAGE

Germicidal lamps provide effective protection against microorganisms. A small cross-section is shown below.

When used as directed to disinfect clear water, MEGATRON® Water Purifiers provide an ultraviolet dosage in excess of 30,000 microwatt seconds per square centimeter (µWSec/cm²).

* Nominal Ultraviolet dosage (µWSec/cm²) necessary to inactivate better than 99% of specific microorganism. Consult factory for more complete listing.

OPERATING CHARACTERISTICS

Relative Spectral Energy Distribution (Typical)

Germicidal Effectiveness As Related to Wavelength
STER-L-RAY® Germicidal Ultraviolet Lamps are shortwave, low pressure tubes that produce ultraviolet wavelengths lethal to microorganisms.

Approximately 95% of the ultraviolet energy emitted from STER-L-RAY® germicidal lamps is at 254 nanometers, the region of germicidal effectiveness most destructive to bacteria, mold and virus.

STER-L-RAY® and the STER-L-RAY® logo are trademarks of Atlantic Ultraviolet Corporation®.

CAUTION: Exposure to direct or reflected germicidal ultraviolet rays will cause painful eye irritation and reddening of the skin. Personnel subject to such exposure must wear suitable faceshield, gloves and protective clothing.

Hg – LAMP CONTAINS MERCURY, manage in accord with disposal laws, see: LampRecycle.org.

① Wattage is lamp watts only and does not include ballast loss (approximate).
② Maximum rated output at 254 nanometers.

The lamp listed above has been specially developed and is the only lamp recommended for use with MEGATRON® Disinfection Systems. All STER-L-RAY® lamps used in MEGATRON® Disinfection Systems are low pressure type which afford the maximum efficiency in producing the required germicidal rays. In addition has advantage of high efficiency and low power requirements.
WATER QUALITY RECOMMENDATIONS

FOR CLEAR, FRESH WATER APPLICATIONS

Turbidity:
5 Nephelometric turbidity units (N.T.U.)

Total Suspended Solids:
10 milligrams per liter (mg/L) - maximum

pH: 6.5 - 9.5

Color: None

Hardness:
6 grains per gallon (g.p.g.) or 102 parts per million (p.p.m.)

Iron:
0.3 milligrams per liter (mg/L) - maximum

Manganese:
0.05 milligrams per liter (mg/L) - maximum

Ultraviolet Transmission:
80% through one centimeter - minimum

FOR WASTEWATER APPLICATIONS

Biological Oxygen Demand:
30 milligrams per liter (mg/L) - maximum

Total Suspended Solids:
30 milligrams per liter (mg/L) - maximum

Ultraviolet Transmission at 254 nanometers:
65% through one centimeter - minimum

* Other water quality applications may be treated by ultraviolet. Contact one of our ultraviolet specialists with your requirements.

The MEGATRON® Model M250 has been verified by The Environmental Technology Verification Program®. To learn more about the Environmental Technology Verification Program® visit: www.epa.gov/etv

Information on the performance characteristics of the Megatron® Model M250 [June 2002] can be found at www.epa.gov/etv, or call Atlantic Ultraviolet Corp. at 631-273-0500 for a copy of the verification report. Use of the ETV Name or Logo does not imply approval or certification of this product nor does it make any explicit or implied warranties or guarantees as to product performance.

### Notes:

1. **SANITRON®** Model S10,000C through S25,000C come equipped with mounting rack.
2. **MIGHTY•PURE®** MP36C and MP49C are available with NSF®/ANSI 55 for Disinfection Performance, Class B.
3. **SANITRON®** Models S37C, S50C, and S2400C are certified to NSF®/ANSI 61 & 372. Model S2400C is used in modular form to build larger models.

- When used as directed to disinfect clear water, Atlantic Ultraviolet Corporation® water purifiers provide an ultraviolet dosage in excess of 30,000 micro-watt seconds per square centimeter (µWSec/cm²).

- This list depicts options for 120v 50/60Hz operation. Consult factory for options with other power requirements.
