

**CUSTOMER ORDER FORM**

**How to Order**

Ready-to-order products are listed below. Complete this form and fax or email it to us at [sales@standfastusa.com](mailto:sales@standfastusa.com). A sales representative will be in touch within 24 hours to discuss your order and payment options.

**ISO TRAM**

ISO TRAM consists of a rail-mounted TRAM unit fixed to a transportable frame especially designed for fitting onto ISO Containers. The frame is lifted into place by a forklift and then locked into position at the ISO connections. It can be supplied with or without a ladder or walkway.

	QTY
w/ladder (y/n)	
w/walkway (y/n)	

**RAIL TRAM**

Rail TRAM is designed specifically for insulated chemical tankers with washout ports and side access ladders.

QTY

**FIXED BASE TRAM**

Fixed Base TRAM (or FBT) consists of a pivoting TRAM arm without a TRAM Rail and is designed to protect the operator during access and egress from a ladder to a platform where movement by the operator along a work surface is not required. These units come in left handed or right handed configurations.

QTY

**FIXED BASE TRAM with Rotating or Extended Rotating Arm**

Fixed Base TRAM with rotating and extended rotating arms give the operator the access and egress benefits of the FBT but increase the size of the work area the operator can access or allow the operator to rotate the arm out of their way while performing tasks.
