Dialer Board

The Dialer Board allows emergency calls to be sent from a Shield30 Master Command Panel to a standard phone line.

Specifications

Enable two-way conversation when a Remote is in emergency. Ability to configure timeout to dial. The Dialer Board is contact-ID enabled and identifies each individual Remote. It also gives the user the ability to record site-specific audio messages with instructions. The Dialer Board will connect to the Command Panel using a RJ-45 ethernet connection. Dedicated POTS phone line with a RJ-11 jack. Board connects to system 24V power supply.
