

**40
GALLON**

Refueling & Auxiliary Options

Transfer Flow introduces fuel tank systems that fit under a bedrail tool box!

If you have an over-the-bed-rail tool box and want to increase the fuel capacity of your truck, our 40-gallon fuel tank is the perfect solution! It fits under the tool box and is available as a refueling or auxiliary fuel tank. And with the addition of our refueling kit, you can easily convert your auxiliary tank into a refueling tank!

The compact design of our 40-gallon fuel tank fits under most over-the-bed-rail tool boxes, including those made by ProTech.

The low-profile design of the 40-gallon refueling tank fits under most over-the-bed-rail tool boxes, including ProTech® tool boxes. Constructed from 12-gauge, high-yield U.S. aluminized steel, this tank offers superior durability and strength. It is also powder-coated black for a long-lasting satin finish. As with all Transfer Flow fuel tank systems, this fuel tank comes with all the necessary parts for installation as either an auxiliary or refueling system.

SHORT AND LONG BED

AUXILIARY FUEL TANK

Fits: 2008-25 Ford, 2011-25 GM/Chevy, 2010-24 Dodge/Ram
