FFC – FLOATS AND FUEL CELLS, INC. OF MEMPHIS, TENNESSEE RECEIVES FAA APPROVAL TO MANUFACTURE MD HUGHES 500 REPLACEMENT FUEL CELLS

FFC received Part Manufacturing Approval to manufacturer replacement MD Hughes 500 fuel bladders (MD P/N 369H8101-3 and 369H8101-5).

Floats and Fuel Cells, Inc. is a Memphis, Tennessee Fuel Tank Manufacturer. Kevin Brewer, Director of Sales and Marketing for Floats and Fuel Cells, Inc. announced the FAA has granted FFC the approval to manufacture replacement fuel cells for the Hughes 500 helicopter. These are the latest approvals for FFC and the first of the rotorcraft product line outside the Bell family.

FFC continues to look for opportunities in the development of replacement fuel cells needed for various helicopter models. Brewer commented, "We are very excited about these latest additions to our rotorcraft product offering, and we have several more part numbers in development nearing approval. We will continue to expand our rotorcraft capabilities."
