

AccuDRYve™ System Feature & Benefits:

Feature: AccuDRYve automatically stops driving when washer is properly deflected

Benefit: Fastener seats correctly for leak proof seals

Feature: Our system ensures a high quality seal every time

Benefit: Fewer leaks and callbacks and happier customers

Feature: Foolproof pressure-sensing system eliminates user error

Benefit: AccuDRYve™ technology turns even beginners into pros

Feature: Consistent, leak proof long lasting seals

Benefit: Peace of Mind and the freedom to offer a superior warranty

Feature: Engineered washer deflects to a flat shape with the proper amount of force

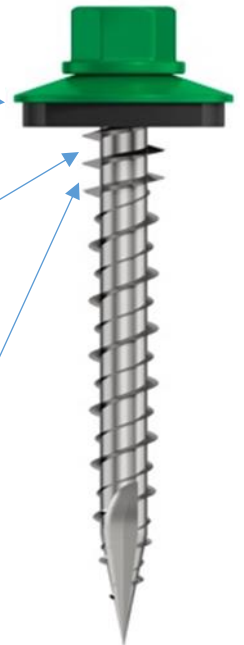

Benefit: Engineered flex causes AccuDRYve to automatically stop driving for optimal sealing

Feature: No lift thread under the washer pushes and extrudes the metal downward

Benefit: Prevents metal panel from cutting the washer and causing leaks and corrosion

Feature: No lift thread under the washer prevents the metal panel from riding up the screw

Benefit: This ensures that metal panel is flush with wood before fastener is properly seated

Over-driving the screw can split the washer and dimple the metal, causing leaks.
