FFC - FLOATS AND FUEL CELLS, INC OF MEMPHIS, TENNESSEE EARNS AS9100 CERTIFICATION

FFC and FFC Manufacturing are setting the standards for Aircraft Fuel Cell Manufacturer's throughout the United States.

Fred Tavoletti - President of Floats and Fuel Cells, Inc., a Memphis, Tennessee Fuel Tank Manufacturer announced today that as part of the organization's continuous quality improvement, FFC and FFCM have achieved the AS9100 Aerospace Quality Standard Certification - Certificate number : 12986.

National Quality Assurance (NQA), one of the largest and most respected ISO registrars in the world presented FFC and FFCM with both the AS9100 and ISO9001:2008 certifications after successfully completing a rigorous Quality Management Systems Audit.

The ISO 9001:2008 is the latest revision, and the AS9100 was designed to enhance this standard by focusing on the additional expectations and requirements of the aerospace industry. Many leading aerospace manufacturers and governments around the world now require ISO 9000 and AS9100 Certification as a prerequisite to doing business.

Kevin Brewer, Director of Sales and Marketing said, "This Certification achievement assures our current OEM customers of our commitment to providing an overall quality business experience and positions the organization for world wide opportunities. We are proud to have attained the certification and join the ranks of other well recognized organizations such as Boeing, Lockheed Martin, and Northrop Grumman."
