

## OGDC-E2

### Antigen Specification

**Product Number: 17800**

**Description:**

Human 2-oxoglutarate dehydrogenase complex (E2/dihydrolipamide acyltransferase-subunit OGDC-E2; M2 component).

Recombinant antigen for research use or manufacturing only.

**Immunological function:**

Binds IgG-type human auto-antibodies.

**Origin:**

Recombinant. Expressed by recombinant baculovirus (*Autographa californica* multiple nuclear polyhedrosis virus; AcMNPV) infection of *Spodoptera frugiperda* Sf9 insect cells.

**Expression construct:**

Full-length cDNA coding for the mature form of the human OGDC-E2 protein fused to a hexa-histidine purification tag.

**Biochemical tests:**

SDS-PAGE (purity > 75%); Western blot with i: anti-M2 autoantibody-positive sera; ii: monoclonal anti-hexa-His-tag antibody.

**Calculated molecular weight:**

42,301 Dalton

**Calculated isoelectric point:**

pH 6.3

**Immunological tests/Functionality:**

Standard ELISA test (checkerboard analysis of positive/negative sera panels); immunodot and microarray test with positive/negative sera panels.

**Recommended buffer/storage and handling conditions:**

Recommendations for storage buffer: ionic strength around 200 mM salt, neutral to slightly alkaline pH and 20% glycerol as cryoprotective agent. Storage conditions: -70°C or below. Repeated freeze/thaw cycles should be avoided.

**Coating concentration:**

0.4-1.0 µg/ml (depending on the type of ELISA plate and coating buffer). Suitable for labeling of functional groups.
