

## Centromere Protein B (CENP-B)

### Antigen Specification

**Product Number: 12500**

**Description:**

Human centromere protein B (CENP-B). Recombinant antigen for research use or manufacturing only.

**Immunological function:**

Binds IgG-type human auto-antibodies.

**Origin:**

Recombinant. Expressed by recombinant baculovirus (*Autographa californica* multiple nuclear polyhedrosis virus; AcMNPV) infection of *Spodoptera frugiperda* Sf9 insect cells.

**Expression construct:**

Full-length cDNA coding for the human centromere protein B fused to a hexa-histidine purification tag.

**Biochemical tests:**

SDS-PAGE (purity > 90%); Western blot with i: anti-CENP-B autoantibody-positive sera; ii: monoclonal anti-hexa-His-tag antibody.

**Calculated molecular weight:**

65,940 Dalton

**Calculated isoelectric point:**

pH 4.4

**Immunological tests/Functionality:**

Standard ELISA test (checkerboard analysis of positive/negative sera panels, including CDC international reference sera); line assay and microarray test with positive/negative sera panels.

**Recommended buffer/storage and handling conditions:**

Recommendations for storage buffer: ionic strength around 150 mM, neutral to slightly alkaline pH and 20% glycerol as cryoprotective agent.

Storage conditions: -70°C or below. Repeated freeze/thaw cycles should be avoided.

**Coating concentration:**

0.15-0.375 µg/ml (depending on the type of ELISA plate and coating buffer). Suitable for labeling of functional groups.
