

La/SS-B

Antigen Specification

Product Number: 12800

Description:

Human La/SS-B.
Recombinant antigen for in vitro research and manufacturing use only.

Immunological function:

Binds IgG-type human auto-antibodies.

Origin:

Recombinant. Expressed by recombinant baculovirus (*Autographa californica* multiple nuclear polyhedrosis virus; AcMNPV) infection of *Spodoptera frugiperda* Sf9 insect cells.

Expression construct:

Full-length cDNA coding for the human La protein fused to a hexa-histidine purification tag.

Biochemical tests:

SDS-PAGE (purity > 90%); Western blot with i: anti-La/SS-B autoantibody-positive sample; ii: monoclonal anti-His-tag antibody.

Calculated molecular weight:

48 kDa

Calculated isoelectric point:

pH 6.9

Immunological tests/Functionality:

Standard ELISA test (checkerboard analysis of positive/negative samples, including international reference sera obtained from the CDC, Atlanta, GA, USA); line assay and immunodot analyses with positive/negative samples.

Recommended buffer/storage and handling conditions:

Recommendations for storage buffer: neutral to slightly alkaline pH and 20% glycerol as cryoprotective agent. Storage conditions: -70°C or below. Repeated freeze/thaw cycles should be avoided.

Coating concentration:

0.6-1.1 µg/mL (depending on the type of ELISA plate and coating buffer). Suitable for labeling of functional groups.
