SKIN TYPE

All skin types: Especially oily,
sensitive or problematic skin types

PURPOSE

This multi-benefit, anti-aging complex is specifically formulated for stressed, oily, combination skin types. The latest cutting edge stem-cell ingredient derived from Oranges, helps to restore the extracellular process and skin microrelief, while a cell-communicating peptide acts on emerging wrinkles and fine lines to minimize their appearance. A synergistic combination of bisabolol and ginger root balance and calm sensitive, problematic skin. Beet root extract promotes hydration levels within the skin, while soothing botanicals provide additional restorative moisture. The addition of encapsulated microspheres offer sebum absorption and control, while scattering light to diminish the look of fine lines, leaving a soft-focus, matte finish on the skin.

BENEFITS

Obtained from orange stem cells, that contain amino acids, especially proline and betaines, as well as organic acids, sugars, peptides and proteins. Organizes and redensifies the dermis structure, by increasing the synthesis of the elements forming the extracellular matrix. Regular and well defined microrelief, fewer wrinkles and improved overall appearance; The skin recovers the elastic properties it had 12 years ago.

Enhances cell communication between damaged areas of skin to help strengthen and increase water levels. Creates a synergistic effect in the neo-synthesis of collagen, significantly reducing the appearance of wrinkles.

Multiple-benefit synergistic blend of sustainable Bisabolol and organic ginger that targets all major inflammatory mediators and it has triple anti-irritant efficacy. Effectively balances and calms sensitive and/or problematic skin.

Plant-derived active ingredient blend that immediately starts raising the hydration levels in the stratum corneum, making the skin smoother, more supple, and optimizing its barrier function.

Microspheres that offer sebum absorption and control. They are also able to scatter light to diminish the look of fine lines, while leaving a soft-focus finish on the skin.

Obtained through transesterification of the fatty acids triglycerides from the milk thistle plant. Offers lightweight, dry-skin feel and non-sticky emollient properties, while providing the skin with perfect comfort, softness and flexibility. Non-comedogenic.

Calming, soothing and skin softening.

Derived from the plant leaf; antioxidant protects from free-radical damage. Calms inflamed or damaged skin.

HOME USE

After cleansing, dispense 1-2 pumps and gently massage evenly over face and neck until absorbed. Apply morning and evening for optimal results.
