Press Release

Chemical Containers, Inc.
Announces
Deicing Summer Special 2016

Just how exactly can a company from Florida help you win the war on ice?

Since 1983 Chemical Containers, Inc. has dedicated its business to providing the industry's highest quality containment and application equipment. CCI President and Founder, John Motis stated "In support of various industries, we've implemented and innovated technologies in order to make anti-icing, aquatics, right-of-way, agriculture, forestry, turf, and pest control equipment more efficient."

And to prove a company from Florida can support the deicing operations of the north, Chemical Containers has developed and supplied numerous businesses and government entities with deicing equipment in New York, Georgia, Ohio, Illinois, Tennessee, Kansas, Montana, Nevada, and Northern California.

The Florida Sunshine hasn't clouded our vision or ability to help you win the war on icy roads. So let a company from the Sunshine State spread the warmth and melt your problems away. Visit our website or give us a call at 1-800-346-7867 to get a special discount on deicing equipment when ordered before the last day of 2016 summer. Use Promotional Code **CCI92116** to get 10% off any deicing equipment order.
