Scutellaria Baicalensis (Scullcap) Root Extract

Saxifraga Sarmentosa (Clover) Extract

Vitis Vinifera (Grape) Fruit Extract

Mag C™

INGREDIENTS

PRESENTATION

2 oz. /60 g R-04202

SKIN TYPE

An ideal skin lightener for hyperpigmentation, sun spots and melasma

PURPOSE

An advanced lightening skin cream containing maximum strength hydroquinone to gently fade skin discolorations along with a unique combination of plant extracts (scutellaria, white mulberry, saxifrage, and grape) with very high de-pigmentation effectiveness that acts in synergy to block the formation of melanin.

BENEFITS

Skin lightener

Strong brightening properties

Antioxidant benefits, helps balance skin tone

Increases cell matrix production, brightening properties

Derived from the grape; nutrient rich emollient, antioxidant, rich in phenols, protects against damaging free radicals, anti-aging

Magnesium Ascorbyl Phosphate (Stablized Vitamin C)

Derived from citrus fruits; readily utilized by the skin cells, this powerful antioxidant promotes circulation, stimulates collagen, is skin brightening and helps elastin production; one of the most stable forms of vitamin

HOME USE

After cleansing and toning, apply a thin layer on affected areas twice daily or as directed by skin care professional. Wait 10 minutes after application of lightening cream before applying other skincare products. This will help ensure that the lightening cream is properly absorbed and will not be rubbed off. Must use an SPF 15 or greater to obtain best results. Please keep in mind that all bleaching creams need to be used a minimum of 6 weeks for good results.

PRECAUTIONS: The safety of topical hydroquinone use during pregnancy or in children (12 years and under) has not been established. As a result, hydroquinone products should not be used on pregnant women. It is also not known whether topical hydroquinone is absorbed or excreted in human milk. Therefore, caution is advised when used by a nursing mother. Some people are sensitive to hydroquinone. It is recommended that you test for skin sensitivity before using by applying a small amount to a small patch of skin. If redness or mild skin irritation occurs after 24 hours, discontinue use. If no lightening is noted after 3 months of treatment, discontinue use.
