B-Scan Vet Recommended Computer Specs

If the computer on which you intend to load the B-Scan Software does not meet or exceed the listed specifications, we highly recommend that you do not install the B-Scan Vet Software.

If you wish to purchase an Accutome recommended Dell Latitude E6500 laptop, please contact Dell at 1-800-915-3355

Accutome recommends using the Xerox 8560 and Lexmark D830 printer.

If you wish to purchase an Accutome recommended Printer 8560, please contact Drew Armer at CDW at (877) 685-8896 and reference the “Accutome Xerox Printer.”

The computer used in conjunction with the B-Scan Vet system should be dedicated for the sole use of Accutome’s B-Scan. Installation of software not vital to the operation of the B-Scan is highly discouraged, as it may detrimentally affect the performance of the B-Scan Vet system. Additionally, accessing the Internet will greatly affect the performance of the B-Scan and open the system to viruses and other harmful external factors and is therefore not recommended by Accutome.
