Model S2400C
151 Liters Per Minute
ABOUT US

Since 1963, Atlantic Ultraviolet Corporation® has pioneered the discovery and development of beneficial uses of ultraviolet energy. Over the years these efforts have led to the development of valuable, cost effective and environmentally sound techniques and products now known and respected throughout the world.

The UV Application Specialists at Atlantic Ultraviolet Corporation® assist customers in the selection of germicidal lamps and equipment. Their specialized knowledge is a valuable resource in formulating effective and cost-conscious ultraviolet solutions. Extensive inventories and a dedicated staff enable Atlantic Ultraviolet Corporation® to fulfill its commitment to provide fast deliveries and responsive customer service.

GERMICIDAL ULTRAVIOLET

Ultraviolet water purification is a unique and rapid method of water disinfection without the use of heat or chemicals.

SANITRON® Ultraviolet Purifiers utilize germicidal ultraviolet lamps that produce short wave radiation lethal to bacteria, viruses and other microorganisms present in water.

Through the years ultraviolet technology has become well established as a method of choice for effective and economical water disinfection.

SANITRON® Ultraviolet Water Purifiers are the ideal solution for an ever growing range of water treatment applications.

Atlantic Ultraviolet Corporation® equipment and systems are manufactured in the USA.
ADVANTAGES

Effective
Virtually all microorganisms are susceptible to SANITRON® ultraviolet disinfection.

Economical
Hundreds of gallons are purified for each penny of operating cost.

Safe
No danger of overdosing, no addition of chemicals.

Fast
Water is ready for use as soon as it leaves the purifier — no further contact time required.

Easy
Simple installation and maintenance — Compact models require minimum space.

Automatic
Provides continuous disinfection without special attention or measurement.

Chemical Free
No chlorine taste or corrosion problems.

Versatile
Capacities available from 11 to 1,575 liters per minute (LPM).

PRINCIPLE OF OPERATION

1. The water enters the purifier and flows into the annular space between the quartz sleeve and the chamber wall.

2. The wiper segments induce turbulence in the flowing liquid to assure uniform exposure of suspended microorganisms to the lethal ultraviolet rays.

3. Translucent sight port provides positive indication of germicidal lamp operation.

4. The wiper assembly facilitates periodic cleaning of the quartz sleeve without any disassembly or interruption of purifier operation.

5. Water leaving the purifier is instantly ready for use.

ultraviolet.com • buyultraviolet.com
SPECIAL FEATURES

Quick Lamp Change
Exclusive EASY-OFF™ End Cap enables effortless lamp replacement without shutdown of water pressure or drainage of tank. No tools required.

Removable Flanged Head
Models disassemble completely and easily in the event that repairs are necessary. No special tools or fixtures required. (Models S2400C and larger feature dual removable heads.)

CRystal Clear™ Quartz Sleeve
Ensures optimum lamp output at normal potable water temperatures. (See interior detail page 3.)

Sight Port Plug
Visible glow provides positive indication of germicidal lamp operation.

Drain Plug
Convenient, in-place drainage of purifier chamber.

Type 316 Stainless Steel Construction
Chamber, head, and clamp are made from electropolished and passivated stainless steel for an attractive finish and dependable service.

Wiper Lock
Locks wiper mechanism in retracted position.

STER-L-RAY® Germicidal Lamp
(not shown) Provides the utmost in quality, sustained output, and longevity.

Patented Dual Action Wiper Mechanism

INSTALLATION & MAINTENANCE

The purifier is installed horizontally as close as possible to the point of use. Connection of the inlet and outlet to water supply and insertion of power plug into 3-wire GFCI grounded outlet is all that is required.

Ordinary maintenance consists of cleaning the quartz sleeve with the manual wiper once monthly or more frequently where conditions dictate. Lamp replacement is recommended every 10,000 hours of operation (approximately 14 months of continuous service).
**Promate™ Audio Alarm**
Activated by the SENTRY™ or GUARDIAN™ and alerts user to any malfunction detected

**Promate™ Elapsed Time Indicator**
Real-time, non-resettable display of accumulated operating hours

**Promate™ Solenoid Valve**
Operates with the GUARDIAN™ or SENTRY™ and prevents flow during detected malfunctions

**Promate™ Time Delay Mechanism**
Operates with GUARDIAN™ or SENTRY™ and Promate™ solenoid valve to provide a 2-minute warm-up period for lamp to achieve full germicidal output

**SureFLO™ Flow Control Valve**
- Limits water flow to rated capacities
- Available in PVC and stainless steel

**Promate™ Wall Mounting Kit**
- Stainless steel material provides professional finish
- Pre-drilled and ready for quick and easy mounting of water purifier
- Optimizes free air circulation to cool ballast housing

**QUANTUM™ Thermal Optimizer**
Used to help regulate the water temperature inside the purifier’s chamber

**Promate™ Safety Glasses**
Safety eyewear should be used as general-purpose safety protection and for additional shielding from germicidal ultraviolet rays.

**Promate™ Face Shield**
Lightweight visor with adjustable headgear provides eye and face protection from germicidal ultraviolet rays.

---

**GUARDIAN™ Ultraviolet Monitors**
The GUARDIAN™ Ultraviolet Monitors are available in three models: Analog, Digital, and Digital Remote, and can either be purchased and installed with a UV water purifier, or at a later date for an existing installation.

The GUARDIAN™ Ultraviolet Monitor visually indicates the level of germicidal ultraviolet energy that penetrates the quartz sleeve and water within the water purifier. The use of an ultraviolet monitor is recommended by the United States Public Health Service in “Criteria for the Acceptability of an Ultraviolet Disinfection Unit.”

GUARDIAN™ Ultraviolet Monitors will detect reduction of ultraviolet levels due to:
- Fouling or deposits on the quartz sleeve.
- Poor ultraviolet transmission through the water. Color, turbidity, and organic or other impurities in the water can reduce or interfere with the transmission of ultraviolet rays.
- Lamp outage or ballast failure.
- Depreciation of the lamp output due to usage or other cause. Lamp output gradually depreciates with use. Lamp replacement is recommended once a year or every 10,000 hours.

All GUARDIAN™ Ultraviolet Monitors provide outputs to control the operation of an optional Promate™ Solenoid Valve and/or optional Promate™ Remote Audio Alarm.

**Analog - Direct Mount GUARDIAN™ Ultraviolet Monitor**
Available in two voltage configurations: 120v 50/60Hz and 220–240v 50/60Hz, and can be mounted directly to the water purifier using a standard quartz probe.

**Digital - Direct Mount GUARDIAN™ Ultraviolet Monitor**
Available in two Low Voltage Models: a 12v Model, and a 110/220v Model which uses a multi-plug configuration 12v adapter to operate. This model also provides several outputs for remote monitoring of the water purifier operation:
- 4–20mA Output: Provides current for remote display of ultraviolet intensity.
- Dry Contacts: Provide contacts for remote indication of ultraviolet trip levels.
- 12v DC Output: Provides power for a low-voltage external audio alarm.
- RJ45 Modular Jack Adapter and RJ45 Modular Cable

**Digital Remote - Remote Mount GUARDIAN™ Ultraviolet Monitor**
Intended for use in locations away from the water purifier it is monitoring. In all other respects, the remote monitor operates in the same manner as the standard Digital GUARDIAN™ Ultraviolet Monitor.

**GUARDIAN™ ASSIST Ultraviolet Monitor Extension**
Designed to remotely indicate the intensity level displayed on the GUARDIAN™ Ultraviolet Monitor.

The STERALET™ Lamp Status Alarm monitors visible light emitted through the sight port plug of the water purifier and activates an audible alarm when visible light fails.

- Easy installation, no tools required
- Mounts on the sight port plug
- Operates on a 9v battery
- Monitors the visible light emitted by the ultraviolet lamp (does not monitor the ultraviolet intensity)
- Warns of lamp or power failure
- Produces a high frequency tone, pulsed at two to three cycles per second
- Available with Dry Contact for connection to PLC
- Optional Remote Sounder available
- Optional 120v 60Hz Power Adapter available

The SENTRY™ Safety Sensor provides constant monitoring of the water purifier’s ballast and germicidal lamp operation to give an indication of ballast and germicidal lamp status.

The SENTRY™ Safety Sensor is capable of operating an optional Promate™ Audio Alarm and/or Promate™ Solenoid Valve.

- Easy installation - Plug SENTRY™ into an electrical outlet, and then plug water purifier into SENTRY™
- Operates optional Promate™ Solenoid Valve and/or Promate™ Audio Alarm
- Warns of lamp failure and is easily adaptable for use with other water purifier brands
- Available for 120v 50/60Hz and 220v 50/60Hz water purifiers operating with electronic ballasts

Options may either be obtained when purchase of SANITRON® model is made, or added at a later date. For further details, visit Ultraviolet.com and BuyUltraviolet.com.
ULTRAVIOLET DOSAGE

When used as directed to disinfect clear water, SANITRON® Water Purifiers provide an ultraviolet dosage in excess of 30,000 microwatt seconds per square centimeter (µWSec/cm²).

* Nominal Ultraviolet dosage (µWSec/cm²) necessary to inactivate better than 99% of specific microorganism. Consult factory for more complete listing.

OPERATING CHARACTERISTICS

Relative Spectral Energy Distribution (Typical)

Germicidal Effectiveness As Related to Wavelength

Approximately 95% of the ultraviolet energy emitted from STER-L-RAY® germicidal lamps is at 254 nanometers, the region of germicidal effectiveness most destructive to bacteria, mold and virus.
**GENUINE STER-L-RAY® GERMICIDAL LAMPS**

**STER-L-RAY®** Germicidal Lamps are shortwave, low pressure tubes that produce ultraviolet wavelengths lethal to microorganisms.

**STER-L-RAY®** Germicidal Lamps are well suited to applications requiring high ultraviolet intensity such as water purification.

**STER-L-RAY®** Instant Start Germicidal Lamps are instant starting and utilize a coil filament on each end which operates hot. Lamp life is governed by the life of the electrodes and is affected by the frequency of starting.

**STER-L-RAY®** Preheat Germicidal Lamps are operated by a preheat-start circuit that employs an economical ballast. The preheat circuit requires four electrical connections per lamp and a slight to moderate delay is needed to start the lamp.

**STER-L-RAY®** GX Germicidal Lamps yield 1/3 to 2/3 more ultraviolet output than standard lamps of the same length.

**STER-L-RAY®** and the **STER-L-RAY®** logo are trademarks of Atlantic Ultraviolet Corporation®.

**CAUTION:** Exposure to direct or reflected germicidal ultraviolet rays will cause painful eye irritation and reddening of the skin. Persons subject to such exposure must wear suitable face shield, gloves and protective clothing.

Hg - LAMP CONTAINS MERCURY, manage in accord with disposal laws, see: LampRecycle.org.

</table>

1 Wattage is lamp watts only and does not include ballast loss (approximate).

2 Maximum rated output at 254 nanometers.

3 Patented by Atlantic Ultraviolet Corporation®.

The lamps listed above have been especially developed and are recommended for use with SANITRON® Water Purifiers.

All **STER-L-RAY®** lamps used in SANITRON® Ultraviolet Water Purifiers are low pressure type which afford the maximum efficiency in producing the required germicidal rays. In addition, has advantage of high efficiency and low power requirements.

Note: When used as directed to disinfect clear water, SANITRON® Water Purifiers provide an ultraviolet dosage in excess of 30,000 microwatt seconds per square centimeter (µWSec/cm²).

NSF Certified to NSF®/ANSI 61 & 372

- All inlets and outlets are male pipe threads.
- Total power consumption including ballast loss.

Atlantic Ultraviolet Corporation®

SINCE 1963

- Maximum recommended operating pressure for all purifiers is 100 PSI.
- Pressure drop at maximum recommended flow rate is less than 5 PSI.
- Flow rates are based on Maximum Concentration Levels.
- 120 Volt and 220 Volt models are standard.
- 12 and 24 Volt models are also available for S17A, S23A and S37C
- SANITRON® is available for operation on public power supplied throughout the world.
- Consult factory with specific power requirements.
- Model S2400C is available with alternate inlet/outlet fittings.
COMMERCIAL & INDUSTRIAL

Flexibility
System components are readily reconfigured to meet changing flow and process requirements.

Independent Monitoring
Single lamp chamber design enables separate output monitoring of each ultraviolet lamp.

Standby Capacity
Reserve chambers permit shutdown or replacement of individual components without interruption of service.

Special Options
- Sanitary and Custom Fittings for system compatibility (Use of Sanitary Fittings does not mean High-Purity Standards are met)
- Special Configurations for TOC and ozone reduction

(For larger capacities please refer to our MEGATRON® Ultraviolet Water Disinfection catalog.)

Model S5,000C
314 Liters Per Minute

Shown with supplied Interconnect piping, optional GUARDIAN™ Digital Ultraviolet Monitors, Promate™ Solenoid Valve, SureFLO™ Flow Control Valve and customer supplied piping, union and shut-off valve.

Note: When used as directed to disinfect clear water, SANITRON® Water Purifiers provide an ultraviolet dosage in excess of 30,000 microwatt seconds per square centimeter (µWSec/cm²).

1 Two S2400C’s connected in series, 1 inlet and 1 outlet.
2 Two S5,000C’s connected in parallel, 2 inlets and 2 outlets.
3 Three S5,000C’s connected in parallel, 3 inlets and 3 outlets.
4 Four S5,000C’s connected in parallel, 4 inlets and 4 outlets.
5 Five S5,000C’s connected in parallel, 5 inlets and 5 outlets.
6 All inlets and outlets are male pipe threads.
7 Total power consumption including ballast loss.

- Maximum recommended operating pressure for all purifiers is 100 PSI.
- Pressure drop at maximum recommended flow rate is less than 5 PSI.
- Flow rates are based on Maximum Concentration Levels, shown on page 8.
- 120 Volt and 220 Volt models are standard.
- SANITRON® is available for operation on public power supplied throughout the world.
- Consult factory with specific power requirements.
- Models S2400C through S25,000C are available with alternate inlet/outlet fittings.

Our S2400C water purifiers are certified to NSF®/ANSI Standard 61 & 372. They are used in modular form to build each of the models shown above.
**COMMERCIAL & INDUSTRIAL**

*Model S10,000C — 628 Liters Per Minute*

**APPLICATIONS**

- Amusement / Water Parks
- Restaurants
- Resorts / Hotels / Motels
- Ships / Yachts / Boats
- City / Well Water
- Fountains / Lakes / Ponds
- Laundry
- Apartment Complex
- Swimming Pools
- Nursing Homes
- Schools
