PTAC CLEANING CRADLE™

PATENTED PTAC CLEANING CRADLE™ SYSTEM

Hundreds of PTAC units can be found in hotels, condominiums, apartments, assisted living facilities, college dorms, and other public and Private facilities.

If PTAC units go without regular cleaning maintenance, they can have a severe negative impact on indoor air quality, increased energy consumption, and even a decrease in the life span of the PTAC unit.

If cleaning maintenance is neglected too long, property owners and managers can face expensive damage to rooms and property and costly downtime in occupancy.

Point Your Phone Camera at this QR Code to Watch the PTAC Cleaning Cradle Video

If you are a property owner looking for a simple solution for regular PTAC cleaning maintenance or a contractor interested in additional revenue from a new service, the patented PTAC Cleaning Cradle delivers a cost-saving solution that reduces on-site manpower, increases efficiency, and provides a quick return on investment.

Features & Benefits

- The PTAC Cleaning Cradle was engineered to assist in the cleaning of any PTAC (hotels, motels, condominiums, nursing homes, apartments, hospitals, etc.), regardless of the age of the PTAC, or its placement in the room
- The Cradle adjusts vertically from 2.5-16 inches off the floor so it can be used with most PTAC units in any room
- The PTAC Cleaning Cradle tilts forward or backward, left or right, to direct wastewater to the vacuum for constant removal of wastewater during the cleaning process
- Durable Stainless Steel construction, minimum wear on parts, made in the USA
- Works with any cleaning extractor machine that pumps water and has a wet and dry vacuum system
- For all access conditions, one person can load and unload
- A “Green product” in that it saves electricity, keeps mold spores and fungus out, and allows PTAC to be operating more efficiently, thus extending the life of the PTAC, increasing customer satisfaction
- Optional accessories are available for the Galaxy Pro machine for cleaning carpets, stairs, upholstery, etc.

Multi-Purpose Options

The PTAC Cleaning Cradle can be used with an existing extractor or our other multi-purpose cleaning equipment and high-pressure carpet extractors.

Pair the Cradle with our CR2 touch-free restroom cleaning system. You now have a PTAC cleaning solution, a touch-free restroom cleaner, a heat-ready carpet cleaning solution, and a surface disinfecting system in one complete package.

Get the most out of your equipment investment!
