

## Features

- Clear Lexan cover
- Galvanized steel backplate
- Eight supplied magnets to secure documentation or signage
- Three sizes available

# Temporary Display Frames

Protect critical documentation and signage on your job site with one of these temporary frames designed to quickly and easily change out their displays.

## Specifications

Temporary Display Frame backplate will be constructed of 20 gauge galvanized steel with .06 clear Lexan cover which will be held in place by slot and tabs on bottom of backplate. Outer tabs on top of backplate can be bent to secure cover. Center tab on top of backplate shall have a hole for a lock to be secured (not included). Eight 11/16" diameter magnets shall be included to secure documents to backplate.
