

Germicidal Ultraviolet Air & Surface Disinfection Model Comparison	SANITAIRE® Germicidal UV Room Air Sanitizers 	Hygeaire® Germicidal UV Indirect Air Disinfection 	Sanidyne® Germicidal UV Portable Area Sanitizers 	AeroLogic® Germicidal UV Air Duct Disinfection Systems 	Sani-Ray® Germicidal UV Recessed Fixtures 	SaniLIGHT® Germicidal Ultraviolet Irradiators 	Biolux® Germicidal Ultraviolet Fixtures 	Nutripure® Germicidal Ultraviolet Sanitary Conditioners 
Made in the USA From U.S. & Imported Parts								
Principle of Operation	Utilizes a combination of germicidal UV lamps, filters and blowers for controlled flow of purified air.	Indirect fixture utilizing germicidal UV lamps and a series of specially designed louvers to direct UV rays to upper portion of room. Must be installed on wall at 7 feet or above.	Portable fixture utilizing multiple lamps providing direct UV rays to disinfect entire areas (large rooms) very quickly.	Equipment designed with germicidal UV lamps specifically for heating, ventilation and air conditioning systems. May be installed in new or existing ducts.	Direct germicidal UV rays are emitted in long, unobstructed lines providing areas and surfaces with destruction of microorganisms.	Direct germicidal UV rays are emitted in widespread path providing areas and surfaces with destruction of bacteria, mold, and virus.	A variety of small, low wattage fixtures for direct germicidal UV disinfection. Ideal for limited spaces.	Designed explicitly to treat the air in the head space of a liquid storage tank in order to prevent condensation and product contamination.
