GERMICIDAL ULTRAVIOLET

Ultraviolet is a unique and rapid method of disinfection. It utilizes germicidal ultraviolet lamps producing short-wave radiation at 254 nanometers (nm)—a wavelength highly lethal to bacteria, virus, and other microorganisms.

An ever growing range of industries and consumer applications have found ultraviolet to be the ideal solution for their air and surface treatment needs.

Atlantic Ultraviolet equipment and systems are manufactured in the USA.

ABOUT US

Since 1963, Atlantic Ultraviolet Corporation® has pioneered the discovery and development of beneficial uses of ultraviolet energy. Over the years these efforts have led to the development of valuable, cost effective, and environmentally sound techniques and products now known and respected throughout the world.

The UV Application Specialists at Atlantic Ultraviolet Corporation® assist customers in the selection of germicidal lamps and equipment. Their specialized knowledge is a valuable resource in formulating effective and cost-conscious ultraviolet solutions.

Extensive inventories and a dedicated staff enable Atlantic Ultraviolet Corporation® to fulfill its commitment to provide fast deliveries and responsive customer service.

Model AERO-24

Model AD24-2

LAMP Residential 1

LAMP Residential & Commercial 1 and 2
ADVANTAGES

**Economical**
System requires very little power to operate.

**Safe**
No risk of over-exposure.

**Fast**
Disinfects both air and exposed surfaces in seconds.

**Easy**
Simple installation and maintenance.

**Automatic**
Continuous disinfection without special attention.

**Durable**
Polished Stainless Steel and/or Aluminum.

**Versatile**
Numerous models available to handle various duct sizes and configurations.

**Low Maintenance**
Requires only annual lamp replacement and periodic cleaning.

PRINCIPLE OF OPERATION

**AeroLogic®** is primarily used for installation in new and existing HVAC (Heating, Ventilating & Air Conditioning) systems. The air that passes over the installed **AeroLogic®** is subjected to the rays from the germicidal ultraviolet lamp (or lamps). These germicidal rays destroy airborne microbes including bacteria, mold, and virus.

The **AeroLogic®** Air Duct installation presents centralized and non-intrusive applications that are useful on their own or in conjunction with additional air circulation and filtration technologies. When used together, these systems provide high level protection solutions.

The **AeroLogic®** design has been carefully conceived to provide adequate germicidal dosage for air stream or surface disinfection. The dosage, as it applies to ultraviolet disinfection, is a function of time, and the intensity, of ultraviolet radiation, to which the air stream or surface is exposed.

Our UV Application Specialists would be happy to perform the necessary calculations to ensure the model we provide is appropriate for your particular application.

---

*LAMP 2and4 Commercial*

**Model ADHO24-4**
AeroLogic® One Lamp Air Duct Model

Utilize the AeroLogic® One Lamp Air Duct Disinfection System in an HVAC system for reduction and/or elimination of the growth of bacteria, mold and spores, and to help control the spread of airborne cold, flu virus, and other airborne transmitted diseases.

The following information is required to size an ultraviolet system for duct air treatment:

- Duct or plenum size
- Length of compartment or duct where AeroLogic® is to be installed
- Air speed typically provided in cfm (cubic feet per minute)
- Approximate air temperature

With this information, an Ultraviolet Application Specialist can calculate the approximate contact time and lamp output required under these conditions and recommend the AeroLogic® model needed.

STER-L-RAY®
Germicidal Ultraviolet Lamp
Lamp is instant starting and provides the utmost in quality, sustained output and longevity. (See page 11 for more information.)

Construction
Designed for use in residential applications, the AeroLogic® One Lamp Air Duct Model is constructed of lightweight, anodized aluminum alloy. The anodized aluminum alloy offers an increased surface hardness, for durability, and corrosion resistance similar to that of stainless steel. This rugged construction along with a water-resistant power cord, rated for indoor/outdoor use, and liquid-tight cord grip all work to form a “drip-proof” assembly.

Surelite™ Ballast
State-of-the-art electronic ballast specifically developed for the operation of ultraviolet lamps. Versatile ballast provides high lamp output; is lightweight, efficient, and operates cool for longer life.

CRYSTAL CLEAR™ Quartz Sleeve
A unique feature of the AeroLogic® One Lamp Air Duct Model is the use of a specially designed quartz sleeve to protect and insulate the germicidal ultraviolet lamp. The quartz sleeve protects the ultraviolet lamp from deposits of dirt and/or dust while insulating it from low air temperatures and the cooling affects of high air velocities in the air duct, ensuring optimum ultraviolet output.

Steadfast™ Bayonet Socket Mount Lampholder
Bayonet Socket Mount four-pin lampholder fastens the lamp securely while providing convenient, “quick and easy”, lamp change.

Promate™ Observation Port/Sight Glass Assembly and Mounting Hardware (included)
A Sight Glass Assembly allows for visual inspection of the lamp, without the need to remove the AeroLogic® from the duct (see page 5).

Mounting Hardware and Gasket - (included)
The AeroLogic® One Lamp Air Duct Models - primarily used for installation in new and existing HVAC (Heating, Ventilating & Air Conditioning) systems, and are mounted onto the outside of the air duct.

1. Rated average lamp life is 10,000 hours.
2. Total lamp watts.
3. Ultraviolet Output at 254 nanometers at 100 hours and 80° F (approximate).
4. See Figure 1 above for illustration of Partial Internal Mounting.

** Not recommended for horizontal mount application.
• 120 Volts 50/60 Hz and 230 Volts 50/60 Hz models are standard. Specify when ordering.
• Available in various voltages. Consult factory with specific power requirements.
• Models with other lamp sizes may be available. Consult factory with specific requirements.
**SPECIAL FEATURES**

**AeroLogic® 1 and 2 Lamp Air Duct Model**

Utilize the AeroLogic® 1 and 2 Lamp Air Duct Disinfection System in your home or commercial/industrial building HVAC system to reduce and/or eliminate the growth of bacteria, mold, and spores. The AeroLogic® also helps control the spread of airborne cold, flu virus, and other airborne transmitted diseases.

The following information is required to size an ultraviolet system for duct air treatment:

- Duct or plenum size
- Length of compartment or duct where AeroLogic® is to be installed
- Air speed typically provided in cfm (cubic feet per minute)
- Approximate air temperature

With this information, an Ultraviolet Application Specialist can calculate the approximate contact time and lamp output required under these conditions and recommend the AeroLogic® model needed.

**STER-L-RAY®**

**Germicidal Ultraviolet Lamps**

Lamp(s) are instant starting and provides the utmost in quality, sustained output and longevity. (See page 11 for more information.)

**ArmorLite™ Safety Shield**

Protective coating can be applied to STER-L-RAY® Germicidal Lamps used in the AeroLogic® 1 and 2 Lamp Air Duct Models to ensure protection for employees, products and work environments by eliminating the dangers associated with fragments of broken lamps and mercury contamination. (See page 10 for Optional Accessories.)

**Construction**

Designed for use in demanding applications; the ballast housing of the AeroLogic® 1 and 2 Lamp Air Duct Models are constructed in Type 304 Stainless Steel.

**Surelite™ Ballast**

State-of-the-art electronic ballast(s) specifically developed for the operation of ultraviolet lamps. Versatile ballasts provide high lamp output; are lightweight, efficient, and operate cool for longer life.

**Model AD-24-2**

(see page 10 for Optional Accessories)

**Steadfast™ Lampholders**

Single pin lampholder set (includes one stationary end and one spring end) holds lamp(s) securely while providing convenient, “quick and easy” lamp change.

**Promate™ Observation Port / Sight Glass Assembly and Mounting Hardware** (included)

A Sight Glass Assembly allows for visual inspection of the lamp(s), without the need to remove the AeroLogic® from the duct (see page 7).

**Mounting Hardware and Gasket** (included)

**SENTINEL® Output Connector**

Optional (See page 10 for Optional Accessories.)

**Lamp Operation Indicators** (LEDs) Provides positive indication of each germicidal lamp operation.

**Atlantic Ultraviolet Corporation**

AeroLogic® 2 and 4 Lamp Commercial Air Duct Model

Utilize the AeroLogic® 2 and 4 Lamp Air Duct Disinfection System in your commercial or industrial building HVAC system to reduce and/or eliminate the growth of bacteria, mold, and spores, and to help control the spread of airborne cold, flu virus, and other airborne transmitted diseases.

The following information is required to size an ultraviolet system for duct air treatment:

- Duct or plenum size
- Length of compartment or duct where AeroLogic® is to be installed
- Air speed typically provided in cfm (cubic feet per minute)
- Approximate air temperature

With this information, an Ultraviolet Application Specialist can calculate the approximate contact time and lamp output required under these conditions and recommend the AeroLogic® model needed.

STER-L-RAY® High Output Germicidal Ultraviolet Lamps

High Output (HO) germicidal lamps yield more UV watts than standard UV-C lamps of the same length. (See page 11 for more information.)

ArmorLite™ Safety Shield

Protective coating can be applied to STER-L-RAY® Germicidal Lamps used in the AeroLogic® 2 & 4 Lamp Air Duct Models to ensure protection for employees, products and work environments by eliminating the dangers associated with fragments of broken lamps and mercury contamination. (See page 10 for Optional Accessories.)

Construction

Designed for use in demanding applications; the ballast housing of the AeroLogic® 2 and 4 Lamp Air Duct Models are constructed in Type 304 Stainless Steel.

Surelite™ Ballasts

State-of-the-art electronic ballasts specifically developed for the operation of ultraviolet lamps. Versatile ballasts provide high lamp output; are lightweight, efficient, and operate cool for longer life.

Model ADHO24-4
(see page 10 for Optional Accessories)
The AeroLogic® 2 and 4 Lamp Air Duct Models - primarily used for installation in new and existing HVAC (Heating, Ventilating & Air Conditioning) systems, and are mounted onto the inside or outside of the air duct. The two most common positions are shown above (models perpendicular to airflow). Many other mounting positions can be achieved using brackets that are supplied with each AeroLogic®.

### PROMO

**Promate™ Observation Port / Sight Glass Assembly**

A Sight Glass Assembly allows for visual inspection of the lamp, without the need to remove the AeroLogic® from the duct.
OPTIONAL ACCESSORIES

**SENTINEL® Remote Lamp Indicator**
The **SENTINEL®** Remote Lamp Indicator monitors lamp operation of two or four lamp ultraviolet fixtures and is available with a 25, 50 and 100 foot cable. (Available for AeroLogic® AD models at the time of purchase. **SENTINEL®** output connector needs to be installed for easy plug-in and operation. The AeroLogic® ADHO models are manufactured with a **SENTINEL®** output connector as a standard feature.)

**ArmorLite™ Safety Shield**
Protective coating can be applied to **STER-L-RAY®** Germicidal Ultraviolet Lamps to ensure protection for employees, products and work environments by eliminating the dangers associated with fragments of broken lamps. (Lamp on right has **Armorlite™** coating. Available for **STER-L-RAY®** lamps used in AeroLogic® AD and ADHO models at the time of purchase. The coating is installed at the factory.)

**CRYSTAL CLEAR™ Quartz Sleeve**
Specially designed quartz sleeve to protect and insulate the germicidal ultraviolet lamp. The quartz sleeve protects the **STER-L-RAY®** Germicidal Ultraviolet Lamps from deposits of dirt and/or dust while insulating it from low air temperatures and the cooling affects of high air velocities in the air duct, ensuring optimum ultraviolet output. (Standard feature in AeroLogic® AERO models, optional for AeroLogic® AD and ADHO models.)

**Promate™ Observation Port/Sight Glass Assembly**
A Sight Glass Assembly allows for visual inspection of the lamp(s), without the need to remove the AeroLogic® from the duct. Available in 1 and 2 inch diameters. One assembly and mounting hardware is included with each AeroLogic® purchased. (Additional assemblies available for ALL AeroLogic® models.)

**Zenith™ UV-C Detector**
The Zenith™ UV-C Detector is a sensitive hand-held, self-contained battery operated ultraviolet meter that can be used for:
- Monitoring UV-C Germicidal Lamp Intensity & Aging
- Measuring UV-C Germicidal Fixture Leakage
(For use with ALL AeroLogic® models.)

**Promate™ Safety Glasses**
Safety eyewear should be used as general-purpose safety protection and for additional shielding from germicidal ultraviolet rays.

**Promate™ Face Shield**
Lightweight visor with adjustable headgear provides eye and face protection from germicidal ultraviolet rays.

* Item must be ordered at same time as AeroLogic® Air Duct Model (installed at factory).
STER-L-RAY® Germicidal Lamps are shortwave, low pressure tubes that produce ultraviolet wavelengths lethal to microorganisms. Approximately 95% of the ultraviolet energy emitted from STER-L-RAY® germicidal lamps is at 254 nanometers, the region of germicidal effectiveness most destructive to bacteria, mold and virus.

STER-L-RAY® Germicidal Ultraviolet Lamps are instant start lamps that utilize tungsten filaments. Lamp life is governed by the life of the filaments and is affected by the frequency of starting. STER-L-RAY® lamps are well suited for a variety of air purification applications, which require high ultraviolet intensity.

STER-L-RAY® High Output (HO) Germicidal UV Lamps are similar in size and shape to conventional germicidal UV lamps but are capable of operating at higher UV output. Atlantic Ultraviolet’s Surelite™ ballasts have been extensively tested with STER-L-RAY® High Output (HO) lamps and are strongly recommended to achieve the best performance and longest lamp life.

STER-L-RAY® and the STER-L-RAY® logo are trademarks of Atlantic Ultraviolet Corporation.

CAUTION: Exposure to direct or reflected germicidal ultraviolet rays will cause painful eye irritation and reddening of the skin. Personnel subject to such exposure must wear suitable faceshield, gloves and protective clothing.

Hg – LAMP CONTAINS MERCURY, manage in accord with disposal laws, see: LampRecycle.org.

ULTRAVIOLET DOSAGE
