PURPOSE

Hyaluronic acid is a naturally occurring substance found in the joints as well as in some organs, and provides lubricity. It binds over 1,000 times its own weight in water, which makes it ideal for boosting and maintaining hydration in the skin. It is a superb emollient. Ionizable.

BENEFITS

Humectant, regulating the level of hydration of skin; forms a moisturizing, non-occlusive layer of moisture on skin

Derived from rice husks; deeply moisturizes, helps heal, regenerative

Soothing, known to reduce inflammation, mild astringent with healing properties

Derived from oats; soothes, nourishes, and calms irritation

Derived from comfrey root; promotes healing, protects, softens and conditions, known to reduce inflammation
