2370

High Speed Dust Control Burnisher

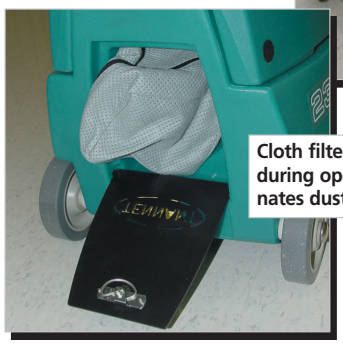

Ergonomic handle and safety triggers increase operator comfort and safety level.

The 2370 folding handle design allows for easy transportation and compact storage.

Cloth filter bag captures dust particles during operation and virtually eliminates dust mopping after burnishing.

Get superior gloss performance from the Tennant 2370 ultra high speed dust control burnisher. This burnisher's low sound level, extremely low vibration and simple operation make it the best in its class. The 20-inch burnishing path is guided by a center caster for easy handling. Automatic vacuum actuation pulls the pad to the floor while the 2000 rpm pad speed delivers an outstanding shine. On board pad adjustment knob and amp meter make optimum down pressure adjustment easy. Ergonomic control grips help reduce operator fatigue by minimizing hand movement during startup and operation.

Constructed of durable polyethylene that resists dents and cracks, the Model 2370 is built to last and can absorb the abuse of everyday burnishing.

The 2370 is perfect for use in noise sensitive environments like retail facilities, schools, office buildings and hospitals. Its low profile base allows the operator to clean hard to reach areas such as under toe kicks, radiators and furniture.

Model Number	2370
Model type	High Speed Dust Control
Speed (on floor)	2000 rpm
Burnishing width	20 in
Cloth filtration level	98% @ 0.1micron
Operation voltage	120V
Motor	1.5 hp
Cord length	75 ft
Operation weight (w/o cord)	80 lbs
Sound level	66 dBA
